

Royalty Curriculum

This program was developed by our very own Julianna Taylor (Lower School Director) to help motivate our Children's Dance level students and get them to become more excited about dance. All this is done while they also discover their individual greatness! What little girl doesn't imagine themselves as a princess? What boy hasn't wished that he was a frog prince? As participants, dancers will be encouraged to use their imaginations to float like a fairy or walk like a king, while discovering their bodies, working on their gross motor skills and coordination. The overall goal of this curriculum is to help dancers to identify all the characteristics that tie into being part of a royal court and learning to develop those traits within themselves. Dancers will be given a goal chart and incentives to track their progress, individual spot markers to help them develop spatial awareness and crowns to give them a visual reminder that they are truly princes and princesses.
