XBRL-CET Meeting at Treasury - DATA Act and DOE FOE

You are invited to listen in during the XBRL-CET working group meeting at Treasury on June 11<sup>th</sup> from 2:00 to 3:00pm (EST). With only an hour there will be limited, if any, time for caller questions or commentary. There will be follow up sessions.

The call will provide a brief overview regarding the status of the XBRL-CET working groups effort to 'herd cats' for fostering open standards based data interoperability, to convey the inevitability that change is coming now, and for stakeholders across the supply chain to better understand where and how they can **engage** so that the transition to interoperability reflects a successful collaboration that benefits all stakeholders, instead of a disjointed series of missteps as competing interests seek to advance a silo approach over a collective synergistic strategy.

Engagement is the operative word, and we trust that after hearing about the collaborative platforms that are in place, from the US Treasury GitHub site for helping with DATA Act compliance to the Department of Energy creating a working group to develop standardized data sets for interoperability to improve the bankability of solar, there are options available for stakeholders to engage from simple awareness to contributing towards technical solutions.

As this meeting is intended for those already familiar with the XBRL-CET working group there will not be any introduction or background provided.

For background please refer to the following links:

June 11th meeting
