FOLEY CATHETERS

Folysil® All-Silicone Foley Catheters   `LATEX FREE`

Radiopaque line allows visualization of the catheter position during x-rays. Made from 100% silicone and have a larger drainage channel than latex-coated catheters of the same external diameter. This increases patient comfort by reducing the potential for obstruction and maintaining efficient flow. An atraumatic tip helps to ease insertion. Sterile. **Not made with natural rubber latex.**

FloCath Quick™ Hydrophilic Coudé Intermittent Catheter   NEW

An "all-in-one" intermittent catheter providing the ultimate convenience. The integrated package contains a FloCath® Hydrophilic Catheter with patented handling sheath and a packet of sterile 0.9% saline. Before opening, break the sterile saline pouch to hydrate the catheter. Sterile saline is much closer to the body's natural fluids than sterile water, and the extremely lubricious coating allows for a comfortable insertion. The handling sheath provides an easy grip, allowing for touchless insertion. The sheath can also be pushed back and used as an extension to the catheter. Designed for single use. **Note: Replace the _ _ with the desired French size when ordering. For example, the item number for a 10 fr catheter would be (RU)220600 1 0 0.**

TELEFLEX®-RÜSCH® BRAND UROLOGICALS (MM/RU)

Rusch® MMG H₂0® Intermittent Catheter Closed System – Singles

NEW

The Rüsch® MMG H₂O® Hydrophilic Intermittent Catheter Closed System by Teleflex maximizes patient comfort and helps reduce urethral trauma. The unique hydrophilic coating, activated by the integrated sterile 0.9% saline pouch, allows the Rüsch® MMG H₂O® to glide easily through the urethra. The soft silicone introducer protects the catheter from bacteria residing in the first few centimeters of the urethra, helping to reduce the risk of urinary tract infection. The collection bag holds 1,300 mL. **Note: Replace the _ _ with the desired French size when ordering. For example, the item number for an 8 fr catheter would be (RU)21096 0 8 0.**

LEG/NIGHT DRAINAGE BAGS

Rüsch® Premium Drainage Bag

LATEX FREE

2,000-mL bedside bag. Not made with natural rubber latex and has kink-resistant extension tubing. Unique design allows for easy filling and emptying of the bag. Features a premium anti-reflux drip chamber and a needleless sample port as well as a universal hanger with additional securing features. The perfect bag for nursing homes, hospitals and home care.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
	(RU)390000	A4357	ea	20/cs

Economy Bag

LATEX FREE

Features anti-reflux valve, hook hanger and center entry. Standard bag that meets market specifications and is cost-competitive. The high grade vinyl bag has a maximum capacity of 2,000 mL, is vented, comes with a synthetic latex bottom outlet tube and 120-cm length tubing. Not made with natural rubber latex.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
	(RU)390060	A4357	ea	20/cs

The Belly Bag®

LATEX FREE

Collection device is worn at the waist and designed for either males or females who have an indwelling catheter. Fastens around the waist by means of a woven belt with a quick-release buckle. Has a 1,000-mL capacity and is not made with natural rubber latex. Anti-reflux valve behind the catheter port prevents reflux urine flow. Emptied by means of a drain tube with a twist valve that is in the approximate position of the urethra. Users can easily sleep with the bag in place, so it can be worn 24 hours a day.

10 fr – 18 fr (even numbers)	(RH)633_ _	A4351	ea	30/cs

Hydrophilic Personal Catheter®

When wetted with the provided sterile water, the catheter becomes extremely slippery for virtually friction-free insertion and withdrawal. Features a secure-grip area for added ease of handling. PVC-free. **Note: Replace the _ _ with the desired French size when ordering. For example, the item number for an 8 fr catheter would be (RH)626 0 8.**

Hydrophilic Personal Catheter® Intermittent Closed Systems

All-silicone catheters feature a hydrophilic coating that becomes very slippery when wet to provide nearly friction-free movement, without the use of lubricating gels. Firm enough for comfortable, easy movement; yet its gentle handling characteristics minimize the trauma that can occur with stiffer catheters. Seamless tip and four comfort-designed drainage eyes enhance movement over sensitive urethral tissue. Packaged with a sterile water packet inside an 1,100-mL collection bag with a prelubricated insertion tip.

	ITEM #	HCPCS	SOLD BY	CASE QTY.

Antibacterial Personal Catheter®

Delivers an antibacterial agent to the urethral-catheter boundary during catheterization. All-silicone catheter is designed for enhanced comfort and elimination of concerns regarding potential health risks that may be associated with repeated exposure to latex- and PVC-containing devices. **Note: Replace the _ _ with the desired French size when ordering. For example, the item number for a 12 fr catheter would be (RH)619 1 2.**

MALE EXTERNAL CATHETERS

Spirit™ Male External Catheters

Combines adhesive and moisture-wicking properties of hydrocolloid with the breathability and flexibility of silicone. Superior breathability for enhanced comfort and optimal skin integrity. Soft silicone and uniform adhesive for secure placement. Clear sheath for easy visual inspection of skin. Kink-resistant design to ensure continuous urine flow.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
STYLE 1				

Adhesive in a length and placement found with traditional male external catheters.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
Small (25 mm)	(RH)35301	A4349	ea	30/cs
Medium (29 mm)	(RH)35302	A4349	ea	30/cs
Intermediate (32 mm)	(RH)35303	A4349	ea	30/cs
Large (36 mm)	(RH)35304	A4349	ea	30/cs
X-Large (41 mm)	(RH)35305	A4349	ea	30/cs

STYLE 2

Combines forward adhesive technology with a 1.5″ sheath. The maximum adhesive area on a short sheath.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
Small (25 mm)	(RH)37301	A4349	ea	30/cs
Medium (29 mm)	(RH)37302	A4349	ea	30/cs

HOLLISTER INCORPORATED (50)

INTERMITTENT CATHETERS

Advance® Plus Intermittent Catheters   `LATEX FREE`

Catheterize with confidence virtually anytime and anywhere. Protective tip helps protect catheter from exposure to bacteria in the first 15 mm of the urethral opening and helps reduce the risk of carrying bacteria up into the urinary system. 1,500-mL collection bag with large handle helps user freely handle the catheter while helping shield it from potential contamination. Smooth eyelets for gentle insertion and withdrawal. User-regulated gel reservoir evenly coats the catheter without additional supplies. Available with and without insertion supplies (gloves, BZK swabs, drape). Advance Plus Pocket features packaging that is 60% smaller. Latex-free. **Note: Replace the _ _ with the desired French size when ordering. For example, the item number for a 6 fr catheter would be 94 0 6 4.**

Mono-Flo™ Anti-Reflux Device Add-A-Foley Trays
LATEX FREE

Include standard prep tray, 2,000-mL drain bag, Safeskin™ Blue Nitrile™ exam gloves and 10-cc prefilled syringe. Mono-Flo™ Anti-Reflux valve automatically closes when bag is tilted, lifted or laid on its side. Large-diameter drip chamber provides dry barrier against bacteria and facilitates the passage of clots. Safeguard™ Needleless Urine Sampling Port provides maximum protection, eliminates needlesticks, and is convenient and easy to use. Feature Safeguard™ Plus Luer Lock Port. Splashguard II™ Drain Spout effectively protects against accidental contact with urine, and opens and closes easily with one hand. Drain spout features back vents to keep chamber dry to help prevent bacterial growth.
