

Evan Chase

Scholarship: \$10,000 Renewable Anchor Scholarship sponsored by Huntington Ingalls Industries (\$2,500/year for 4 years)

College: The Georgia Institute of Technology
Junior

Major: Mechanical Engineering

- I continue to do well in all my classes, though hard, I have managed to maintain a 3.5 GPA and remain on the Dean's list for the 3rd straight semester. I'm also planning a study abroad semester for my junior year.

- I have joined the Georgia Tech chapter student board of the American Society of Mechanical Engineers (ASME). I was selected as the Vice President of Finance. I organize weekly events, connect with company recruiters, set up mechanical engineering career fairs and help assist with mentorship programs.

- I started my own small business to help with college expenses and earn some pocket money. I design decals and T-shirts in Photoshop and Illustrator and sell them online through a 3rd party.

- I'm still a Prototyping Instructor in the student-run makerspace at GT where I continue to instruct students on safe operation of machinery, tools and 3D printers.

- I just returned from a hiking trip to Gatlinburg, TN with my Pi Kappa Phi fraternity.

- This coming summer I have accepted a mechanical engineering internship with Nordson ASYMTEK in Carlsbad, CA.

Thank you!

Evan
