

# Christ the King Learning and Growth Center

March 2019

A shamrock is a young sprig of clover, used as a symbol of Ireland. Saint Patrick, Ireland's patron saint, is said to have used it as a metaphor for the Christian Holy Trinity.

| April 19  | Easter Party   |
| April 21  | Easter Sunday  |
| April 22  | Earth Day  |

**COOL KID FACTS:** Spiders are NOT insects because they only have two body segments instead of three! Spiders spin webs to catch other bugs to eat. The silk found in the spider's abdomen is what creates the web. When released it becomes solid and forms a thread. On average, it takes a spider 60 minutes to make its web. All web spiders rebuild a new web each day. Some spiders eat their old web before stating a new one. While others roll the old up and throw it away!

**JOKE OF THE MONTH:** What is the leprechaun's favorite food? Lucky Charms!
