Optional attachments help you do much, much more...

Furrow/Trench

Edge

Aerate

Clean Cracks & Crevices

Dethatch

Trim Hedges

Plow

Tame Sand Traps & Bunkers

Unbreakable Tines and Industrial Strength Engine!

This wonder tiller is even perfect for bigger jobs like deepening ground for laying ponds, digging fencepost holes or preparing hardscape areas. Plus there are optional attachments that make it even more versatile – and valuable.

An innovative transmission and gear design is the secret that enables this workhorse to deliver maximum digging power despite its light weight. Similar products are OK for spot cultivating, but simply cannot match Mantis for pure digging power, durability and quality. And yet Mantis is extremely lightweight! Unlike the big old tillers our grandparents remember, it's easy to use, simple to maneuver and effortless to transport and store.

The digging tines are made from special spring-steel and are so tough they're guaranteed against breakage for life.

The Mantis Tiller/Cultivator is the answer. It is the only tool you'll need to be virtually assured of a successful garden. And, be confident that your Mantis will be in operation long after similar products have gone to the scrap heap. Performance, quality and durability in a lightweight, compact and powerful small tiller. Owning a Mantis is the only thing standing between you and the garden you've always wanted.

Perfect for small spaces
