

Garden Design Service

Janice Burley – Down 2 Earth

Thank you for your interest in garden design. Down 2 Earth offers a range of services which you can select from as you choose.

Half Day Consultation: Janice will come to your garden and discuss ideas and plans with you. As part of this she can leave you with a sketch plan giving an approximate outline of your garden. This is ideal if you already have some ideas and are a quite practical gardener who is happy to implement plans.

£75

Full Garden Design: Following on from the half-day consultation, Janice will take measurements of your garden, and then draw a scale plan. This may be better if you would like a contractor to carry out the work for you. This also includes suggested plants for different parts of the garden – for example, a list of evergreen shrubs, or perennials ideal for ground cover.

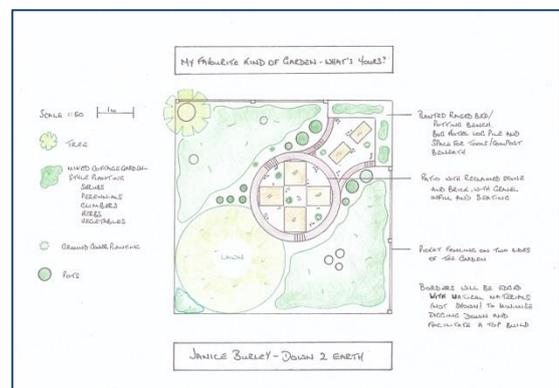

£150 (in addition to the half-day consultation)

About Janice Burley and Down 2 Earth

Janice spent 20 years developing her last garden, and it was re-designed many times. She has recently moved to a much larger garden, which she is gradually re-designing. She gardens organically and as environmentally-friendly as possible, with wildlife in mind. This is reflected in her designs and suggestions.

She has a certificate in garden design from Broomfield College in Derbyshire, and has designed and developed a number of private gardens. She also designed and project managed the implementation of a new public garden at a Church.

She also designed and built a Show Garden at Harrogate Autumn Flower Show 2016 which received a Silver Medal. It was based on a simple design (right), which a competent gardener should be able to re-create. Please see the website for more details about this, and the planting list.

Please get in touch for more information or to book a visit. Thank you.
