## Notice of Service for German Cockroaches

Your unit will be treated on : \_\_\_\_\_

Good preparation is necessary to ensure good results.

Please prepare by following these directions

1. Remove all items from cabinet in kitchen where you see cockroach activity.
2. Remove shelf liners and clean shelves, counters and floor before treatment.
3. If your unit is heavily infested, be prepared to remove pets from the unit. Fish tanks must be unplugged, and the top covered with a damp towel (not plastic, fish will suffocate).
4. Other infested areas of the house such as bedrooms need to be prepared by removing contents in cabinets and dressers so they can be sprayed.
5. Turn off fans and heaters.
6. Be prepared to leave unit for a length of time necessary for the spray to dry, and fog to dissipate. This may be as long as three hours. The technician will further instruct you upon arrival and assessment of treatment protocol.
7. Upon returning, open windows, and wipe down counters in kitchen, including cupboards.

Note that this treatment is with a residual insecticide and bait. . Please be aware that treatments may take up to 3-7 days before full effects are noticed. If, after 10 days, you still have activity., contact your manager.

Thanking you in advance for your cooperation.
