Going Green

At Shadows Pet Services we are trying to be as environmentally green as possible. Not only do we care about you and your pets but about the world we live in too. Our mobile grooming salon is equipped with a solar panel to help us keep the amount of gas used by generator low. It also features a quiet diesel commercial generator engine to keep noise pollution to a minimum. We will be using natural shampoos and conditioners which are all bio degradable. Most of our forms will be filed electronically, receipts e-mailed, vaccination information e-mailed to us all in the effort to reduce our carbon footprint. We are currently working with a Hotel which has donated their gently used towels to our company.
