

LIGHT&GREEN LEGS' CREAM is a smooth and refreshing light formulation targeted to heavy and tired legs. It also contains an extremely natural lipidic phase.

From Indena, it contains:

XIMENOIL[®]: vasoactive on capillaries, the presence of ximenynic acid in the formulation improves blood flow counteracting the heavy legs feeling.

ESCIN BETA SITOSTEROL PHYTOSOME[®]: potent capillary protectant, has a strong anti-oedema activity as well as an anti-inflammatory profile. The presence of beta sitosterol and the Phytosome[®] form endowes escin with a good tolerability profile.
