

# 1961

Diphtheria  
Tetanus  
Pertussis  
Poliomyelitis  
Smallpox

(As per the CDC, these were the recommended inoculations starting in 1961. No further information is available.)

**"I got vaccinated  
when I was a kid  
....it wasn't a  
problem"**

**Do you know  
what the current  
vaccine schedule  
looks like?**

\*No vaccine has been studied for safety in pregnant women.

**These vaccines MAY be recommended.**

**Not a vaccine, but is a shot filled with toxic ingredients**

DTaP: Diphtheria, Tetanus, Acellular Pertussis  
TDaP: Tetanus, Diphtheria, Acellular Pertussis  
HiB: Haemophilus Influenzae Type B  
IPV: Inactive Polio Vaccine  
MMR: Measles, Mumps, and Rubella  
PCV: Pneumococcal Conjugate  
Varicella: Chicken Pox
