

Add our Video Scenario Trainer and train for real dynamic situations. Take your own video, with your camera or smart phone, upload the videos to the Smokeless Range - Video Scenario Traininer, and start training like a pro.

The video trainer will pause when the first shot is detected. Instantly, the shot location will be displayed for your review, to learn your shot placment in this real life scary situation.

This amazing and low cost add-on will complete your Smokeless Range Simulator training, and will add the ability to train for any threat situation.
