

Stickman Matchbook Puzzle

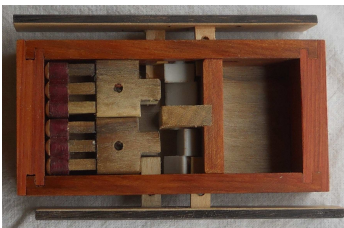

The Stickman Matchbox Puzzle is crafted from redheart (or bubinga) with decorative wenge, yellowheart, and maple inlays. The Stickman hallmark is boldly branded on the lid, and internal matchsticks are meticulously fashioned from walnut, purpleheart and maple.

This is a somewhat small, and notably simpler puzzle to solve than most Stickman Puzzles. Manipulating the sliding components to this box (its drawer and two side-strikers) will reveal a repeating mechanical pattern that must be logically deduced

prior to discovering its single hidden chamber.

Very few of these puzzles were crafted, though additional working plastic replicas may eventually be produced.

Because so many collectors have inquired as to how this puzzle works, (and because it does not fully give away its solution,) I have included a picture of this puzzle's hidden internal mechanics here.

Limited Edition Status: Limited to only 33 completed puzzles.

Production Dates: (August 2015 – November 2015)

Original Sale Price: \$425

Wood types: Redheart or Bubinga, (with Yellowheart, Wenge & Maple inlays.)
