

SEMINAR SERIES **SAVE THE DATES**

THE NOZZLE FORWARD

The one thing that every fire department in the country has is fire hose. The one event that happens on every single fire is a hose-line gets pulled and water gets flowed.

The Nozzle Forward is a class for engine company crews.

It is not a collection of technique; it is an adaptable system of hose line management and fire attack. It is focused around fighting fire, interior offensive firefighting.

Tues/Wed

May 7 – 8 | Windsor Locks, CT
Connecticut Fire Academy

The goal of the “The Nozzle Forward” is to help craft more efficient Engine Companies by increasing the individuals’ competency with their tools and expanding on the conceptual aspects of the fire environment.

The course will integrate the three major components of engine company work; fire behavior, hose management, and fire attack.

THE INSTRUCTOR

Aaron Fields is a firefighter for the City of Seattle and the creator of The Nozzle Forward program. He is a Washington state fire instructor and has taught at the state fire academy for recruit school and department-wide for engine company operations training.
