3. Color the sun red and yellow. Cut a strip of thin cardboard (a strip of a paper plate is just the right thickness). Color the strip black to match the dark sky. Add stars with a white crayon or stickers to your background.

4. Poke a hole in the cardboard strip, the moon, and the black paper Using a brad fastener. Attach the moon and cardboard strip to the black paper (the strip is behind the moon) on the left side of the moon near the Jade Rabbit's tail.

5. Glue the sun to the strip so it can circle behind the moon for the eclipse. Hint: you may have to play around with the position of the sun on the arm so it goes behind the moon. Now make your own eclipse happen!
