

McDSP FEATURES MOO X MIXER AT NAMM 2020

McDSP is excited to head to NAMM 2020 to highlight the all new Moo X Mixer plug-in for the APB-16 Analog Processing Box. From January 16-19, 2020, visit booth 14905 in the North Hall to demo the Moo X Mixer for yourself. Check out our daily high profiled Artist demonstrations for giveaways, swag and more! Artist demonstration schedule is listed below.

The Moo X mixer plug-in is the world's first fully automated hybrid mixing console under total software control. Session recall is instant, and all mixer controls can be automated or saved as a preset. Features include equalization, analog compression and saturation, and a master section with auxiliary input and stereo analog compression and saturation.
