

COSMOLOGY OF CHRIST'S BIRTH

SOLAR & LUNAR ECLIPSE PATTERNS IN RELATION TO CHRIST'S POSSIBLE TIME OF BIRTH

A False Prophet

2. KING OF THE JEWS

Herod the Great

A type of the False Prophet

3. A Divided Land

Nazerat

Jerusalem
Bayt Lahm

Herod the Great's Kingdom
Divided amongst his Sons
4BC.

- Roman Procurators
- Herod Antipas
- Domain of Philip
- Decapolis

The Cosmology of Christ's Birth series does not venture to guess or speculate on the actual date of Jesus Christ's birth but rather emphasize and focus on the peculiarities of the cosmology that perhaps might give additional clues as to the window of the probable time of the King's 1st Advent. The timeline attempts to depict the cosmic occurrences from -5BC to 1AD. Perhaps the patterns that characterized the 1st Advent will mirror what is to be in place when Christ is foretold to return as King at His 2nd Advent; an AntiChrist, a False Prophet, a divided land and rebuilt Temple.

9-MONTH THEORY
IF Jesus was conceived on
8/11 -3BC, then born on
5/09 -2BC around Pentecost

Visitation of the Magi
Possible Timing
Bethlehem

ROSH HASHANA?
BIRTH OF CHRIST?
Roman Registration
No room at Inn due to Major
Feast of Lord at Jerusalem

THE WISE MEN

What the Magi saw in the East, perhaps in Babylon as disciples of Daniel's school of Astronomy. Known as Magos, they were the science of the day mingled with royal administration and oversight of the kingdom. Although 3 'Gifts' are mention in Scripture, they were not necessarily 'Kings' but ambassadors and where probably a caravan of more that accompanied with logistics & supplies to make the trek that perhaps lasted a year. It may well mirrored the Retrograde of Jupiter.

JUPITER - VENUS
1st Conjunction of 2
King Planet w/Mother Planet
(Messiah) the brightest
Planets in the Sky 1 hour
before Sunrise
Aug 11, -3BC

4. A Rebuilt Temple

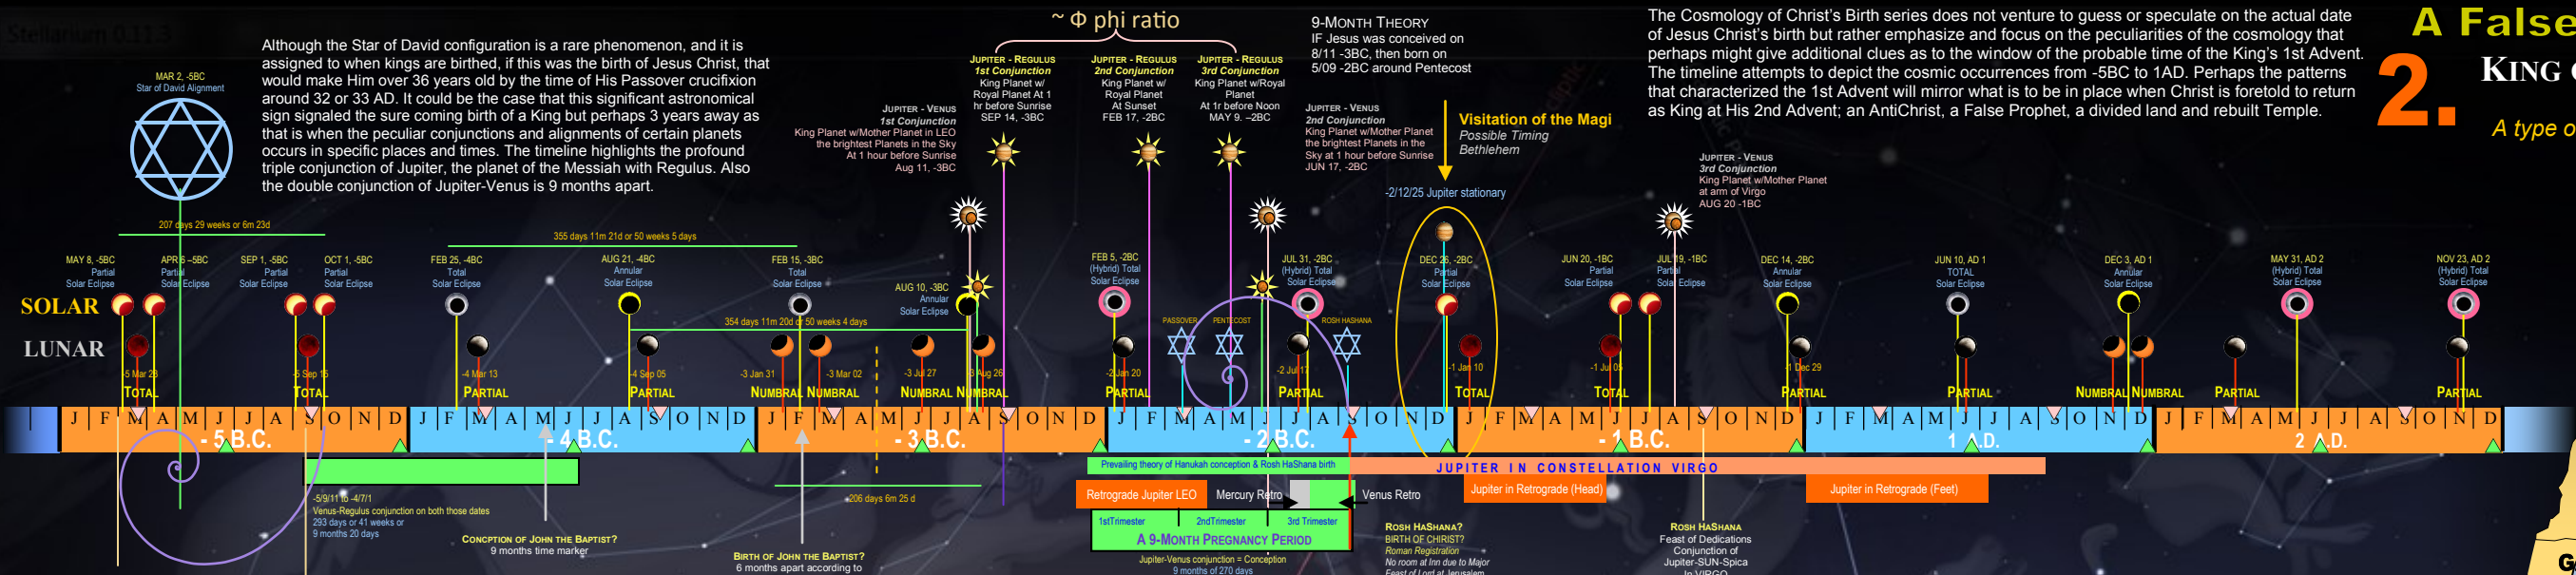

'SON OF GOD'

Caesar Augustus
63 BC - AD 14
A type of the AntiChrist
33 years old in Rome
solidifies empire (NWO) in -31 BC

1. An AntiChrist

Although the Star of David configuration is a rare phenomenon, and it is assigned to when kings are birthed, if this was the birth of Jesus Christ, that would make Him over 36 years old by the time of His Passover crucifixion around 32 or 33 AD. It could be the case that this significant astronomical sign signaled the sure coming birth of a King but perhaps 3 years away as that is when the peculiar conjunctions and alignments of certain planets occurs in specific places and times. The timeline highlights the profound triple conjunction of Jupiter, the planet of the Messiah with Regulus. Also the double conjunction of Jupiter-Venus is 9 months apart.

SOME OBSERVATIONS

- At 1st trimester of Venus-Regulus -3/8/17 to -2/6/11 timeframe Jupiter starts retrograde in Leo.
- The period to include the retrogrades of Jupiter-Venus-Mercury = 9 month gestation period.
- At end of Venus Retrograde the beginning of Jupiter's entry into constellation Virgo starts.
- There are a Tetrad of 4 Partial Lunar Eclipses leading up to the following cosmic conjunctions:
 - 1st Jupiter-Venus conjunction 1 of 3
 - 1st Venus-Regulus conjunction 1 of 2
 - 1st Jupiter-Regulus conjunction 1 of 3
- The Star of David in Mar 2, -4BC occurs in phi ratio to the 2 pairs of Partial Solar Eclipses.
- There is a Total Lunar Eclipse occurring in-between these 2 pairs of Partial Lunar Eclipses
- The last total lunar eclipse, Venus-Regulus conjunction starting a 9 month gestation -5/9/11 to -4/7/1
- The 1st Jupiter-Venus conjunction occurs 2 days after the Annular Solar Eclipse.
- The Venus-Regulus conjunction of 8/17/-3 occurs 8 days from the 4th Partial Lunar Eclipse of Aug 26, -3BC and 7 days after the annular solar eclipse of Aug 10, -3BC.
- The Jupiter-Regulus conjunction occurs in phi ratio distances and time.
- 1st Hybrid Solar Eclipse occurs at the approximate halfway 9-month pregnancy timeframe of the Venus-Regulus conjunctions -3/8/17 to -2/6/11.
- End of 9 month Venus-Regulus conjunction of -2/6/11 is 6 days from 2nd Jupiter-Venus conjunction
- It is at the 3rd trimester of the time of Gestation timeframe of the combined retrogrades of Jupiter, Mercury-Venus to end on -1/6/11.
- The beginning of the 2nd Venus-Regulus conjunction of -2/6/11 coincides with the 2nd Hybrid Solar Eclipse of Jul 31, -2 BC
- Start of Jupiter's retrograde head of Virgo the 1st of 2 coincides with Total Blood Moon of -1/1/10
- The Jupiter stationary motion on Dec 25 coincides with the Partial Solar Eclipse of Dec 26, -2BC.
