Einstein's Unification Theory Akin to Phonon

1. Introduction

The recent discovery of Gravitational wave is a clear signal from the universe that Einstein got it right and his gravitational waves were real. Einstein was motivated by an intellectual need to unify the forces of nature. He felt very strongly that all of nature must be described by a single theory.

§The intellect seeking after an integrated theory cannot rest content with the assumption that there exist two distinct fields totally independent of each other by their nature, Einstein said in his Nobel lecture in 1923.

It has the key to understand universe and life on the earth with assumption that there exist two distinct complimentary fields totally independent of each other by their nature, but interact with each other with phonon-Photon interaction

The huge blast of gravitational wave energy was recorded as a high-frequency Schirp, by LIGO as the black holes rapidly spiralled into one another, merging as one. The Gravitational waves are akin to sound waves that travelled through space at the speed more than the light,

Modern search on Photon-Phonon interaction

The Gravitational waves are akin to sound waves that travelled through space at the speed more than the light. The photon-phonon interaction plays an important role in modern physics and device applications, photons can be scattered by phonons in a crystal. It has opened a new

Einstein's Unification Theory Akin to Phonon

window to discuss photon-phonon interaction as two distinct opposite forces interacting with each other at molecular level Li, E. *et al.* Photonic Aharonov-Bohm effect in photon-phonon interactions. *Nat. Commun.* 5:3225 doi: 10.1038/ncomms4225 (2014)

It has been searched earlier also at Grand Canyon and Egypt with its text in Vedic metaphor symbols to explain universe and life on the earth. Otherwise, it may be considered a new hypothesis to understand universe and life.

It is interesting and amazing to know that Photon and Phonon two distinct equal and opposite forces of nature. They interact with each other in various ways and held up the creation and life, under space time fabric.

Dualistic Force of Vital Energy Phonon and Photon

DUALISTIC FORCE OF VITAL ENERGY

It is strange and stunning to touch the pre-cosmic and cosmic conditions to explain Einstein's Grand Unified Force theory. It is vital energy, which is easily accessible all round, just like one can experience all oceans in a drop of water.

The dualistic force of vital energy is most unseen, most mighty to stimulate thoughts in brain. Just like eyes work on the tune of vision with picture on retina. It is unseen principle and experience of life. It stimulates the action, but not involves in action, and remains unaffected. The Phonon has appeared first in ripper with cosmic dawn in early pre-cosmic condition. It has activated the dark matter with resonance. The phonon and photon manifested with blast and light in a straight way.

The photon and phonon are two complimentary independent forces of vital energy. They interact at molecular level with configuration of electron and half spin change in complimentary wavelength. The immortal phonon with resonance is most mighty force of nature, it disintegrate the photon with electron configuration and subsequent half

4 Phonic Presser Compression Electromagnetic Force

spin change in its complimentary wavelength. Through this the phonon stimulates the event to happen and remains unaffected. The vibrations of electrons with resonance and electrical impulses connect it universally.

When Sarama had found the mountain's fissure, that vast and ancient place she plundered thoroughly. In the floods' van she led them forth, light footed: she who well knew came first unto their lowing.

In the floods' van she led them forth; the gravitational and sound waves led the path of evolution with activation of dark energy in the early universe with blast and light. The Photon and Phonon with charged particles led the path of evolution just like two parallel river opposite struggling for contending reins.

Forth from the bosom of the mountains eager as two swift mares with loosened rein contending.

*Like two bright mother cows who lick their youngling, **Vipasha and Sutudri** speed down their waters. Impelled by Indra whom ye pray to urge you, ye move as 'twere on chariot the ocean (Rig. 3-33-1,2)*

The photon and phonon feed the creation, just like two mother supported by the *Indra*, (electricity), just like two river **Vipasha and Sutudri**. The light and sound are complimentary and follow each other, just like two mares with loosened reins.

Sarama represent micro pulse phonon wave, which find a place in fissure in the dark matter in early pre-cosmic condition. It has plundered thoroughly the dark matter and vibrations of the waves with echo activated the dark matter with concentration in the centre with blast and light. The electromagnetic rays of light travel with vibrations and the photon and phonon run in parallel straight way as complimentary to each other.

Einstein's Unification Theory Akin to Phonon

The man has never seen the voice, yet he see, one man has hearing, but never heard her, but on another man, she showed her beauty as well dressed women to her husband. The phonon is earliest with origin of life. The wise men have created the language for communication. It is imprinted in the mind as blessed sign of friendship with music of life in different tones of seven syllables.

The flow of life channels

Seven sisters sprung from threefold source, (abiding in the three worlds that is , heaven earth and air) the Five Tribes prosper, she must be Invoked in every deed of might (R̥g-Veda 6-61-12)

The seven sisters represent seven rays of visible light, and seven syllables of voice, they are flowing in three fold manner and nourish five gross elements air, water, sun; energy, sky and earth; matter with life in countless channels.

Hear all the Gods my words, Sarasvati give ear together with Puramdhi and with holy thoughts (Rig-Veda 10-65-14)

Speak forth the three words, the words which light precedeth, which milk this udder that produces nectar.

Quickly made manifest, the Bull hath bellowed, engendering the germ of plants, the infant (Rig. 7-101-1)

The *Sarasvati* thought words ensign of existence with chemical energy of food, which generates thoughts in mind and vital energy ensign of life manifest with action, the germ of plants and infants as well.

The three immortal; the resonant vibration of words precede light, they together produced the nectar, which milk this udder with cell body, ensign of existence. With this the fundamental energy Soma, manifested like Bull, and Bull bellowed engendering germ of plants, infant.

6 Phonic Presser Compression Electromagnetic Force

1. The immortal underlying space of sky imparted mass to elementary particles with resonant vibration, ensign of existence of all.
2. The immortal chemical energy of photosynthesis feed the living-beings.
3. The immortal DNA with resonant words is light of life for all

The visible light and audible words have complimentary spectrum. The voice strikes the ear drum and rebound, the message is immediately reached to brain with electrical impulses. The 'Phonic Presser Compression electromagnetic force' is the creative force and operating every where as counter part of life. The photon and phonon are acting as dualistic force of eternal vital energy and feed the creation and life under space time fabric.

They have gone ahead to explain cosmology that Gravitational and Sound waves have played a significant role in the early pre-cosmic condition. The resonant vibration waves with resonance behold the creation and life under space time fabric. The voice is identity of life. It requires radical rethinking on cosmology to understand universe and life.

2. Cosmology

The pre-cosmic dark atmosphere may be like a solid rock without any space with deep darkness everywhere. A dark ripple find a place in the crack like a thief with small ripper, the rippling noise plundered the darkness within darkness thoroughly. The motion in hidden darkness appeared as two opponents in motion like abhorrent floods moving in friendship.

The resonant vibrations with compression concentrated in the centre. The resonant noise rises to revolt with rigour to increase temperature and pressure. The motion hidden in darkness annihilated the darkness with blast, and light of vital energy in

Einstein's Unification Theory Akin to Phonon

action.

The vital energy as oxidizing and reducing agent is the foremost event hidden within dark resonant vibrations with touch and go reaction. It activated the dark matter with manifestation of vital energy, ensign of existence of all. The dark matter as a whole activated into vital energy.

The conquering resonant bands destroy the darkness with touch and go and vital energy born trembling with tongue that flickered. It has freed the complimentary electromagnetic spectrum of resonant vibrations of electromagnetic rays with blast and light.

The activation of dark matter is activation of inherent magnetism in cosmos, with formation of charged elementary particles. The electrostatic force is the force which governs the motion of the elementary particles, which caused them to aggregate or collide in various ways.

The generation of the atom from the subatomic particles with photon-phonon interaction is the primary symbol of existence. All elementary particles are vibrating with resonance of vibration and their respective charge. They are complimentary with each other from gamma rays to radio waves. They find their resonant with resonance. The resonant vibrations of electromagnetic rays, touch, press-mark, and rebound. The colliding protons, decaying into hadron jets and electrons, converted it into electric vibrations to join them in series with phonic compression electromagnetic force. It has maintained its continuity in the molecules and the matter with Higgs field 2013.

The further evolution lead by seven complimentary visible rays of light and audible seven syllables of voice, they drove them forward with their spirit. The voice has seven syllables synonym

to seven rays of visible light, but opposite and complimentary with each other. It has evolved into thought and words with origin of life from DNA.

3. **Higgs field**

The Higgs Boson is associated with a field, called Higgs field, theorized to pervade universe. As other particles travel through this field, they acquire mass.

The life has evolved from the single DNA and cell division to infinity with genetic recombination from infinite space zero. The vibrations of spiraling waves have evolved into thought and words with evolution of life from DNA. The voice retains the blessed sign imprinted on the DNA to follow the mankind from generation to generation. The DNA is universal instrument of life with different genetic identity and voice code phonon. It **regulates the life with hereditary characters from generation to generation.**

The DNA charger, identity code

The DNA is instrument of life. Life consciousness, it is like birds their nest upon the tree, the single phonon wave magically hold the cell body to execute functions of life.

The life in all its form is one, but all have different genetic identity in DNA, which is 99.9 % is same in all. The 0.01 % DNA constitutes the genetic identity of an individual in life. Even the time time-twins have different genetic identity and fate in life. It has four bases arranged in two complimentary base pairs $A=T$ $G=C$ and control whole biological world with double bond and a triple bond of Hydrogen. The DNA has a charger mental code with a synonym

Einstein's Unification Theory Akin to Phonon

phonon code. The specific phonon code activates the charger mental code in the womb from air. The activated mental code led the development of infant from fertilized DNA with sense organs and brain. With development of the body, it has spread in the whole body and is in direct contact of atmospheric ocean of thought waves, which compress it from all sides with their frequency and amplitude. The cell membrane acts as boundary with configuration of electrons with half spin change in the wavelength, it conveyed to brain with electrical impulses for action. The DNA has the speaker and an antenna to grasps the thoughts from atmosphere, the mind executes the thought with words from mouth.

The Life has evolved from resonant vibrations, DNA pair and space with photosynthesis in nature. The life swells like water bubble in the ocean of life under space time fabric. It is just like birds their nest upon the tree. A single phonon wave beholds the life. The DNA is universal instrument of life with inbuilt antenna and speaker with transcription and translation of language code. **It reveals the secret of DNA technology and its replication in air, just like scent weft from flower.** It has been discovered at under ground cave city Grand Canyon, Arizona, North America. The Petroglyphs and Hieroglyphic symbols is art of picture writing system with symbolism for demonstration and teaching. Its text and explanation is in the Vedas.

The vibrations of sound and electromagnetic rays travel parallel with each other in straight way. They have synonym opposite complimentary wave lengths. They have evolved simultaneously into atom, molecules and matter.

The resonant vibrations evolved into thought and words with origin of life from DNA and underlying space imparted mass to elementary particles, ensign of existence of all.

The compression of resonant waves stimulates the DNA code to generate thoughts in the brain to execute function of the body, just like scent weft in the air from flower.

The cellular body beholds the thought mentality adorned to body as one unit along with the atmosphere at micro level. The higher frequency of resonant thought words compress the cell membrane with reverse spin of electrons, it alter the wavelength of DNA mental code chord confined to cell body as one unit with the universe.

The cellular body is the seat of sacrifice, under space time fabric, where life appears in different forms with different bodies. The thought mentality never rest, it travel continuously and appear with life and disappear with death.
