

TITAN series

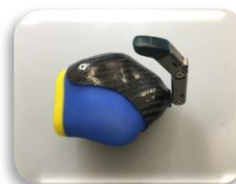

Instructions for use

TITAN series (TITAN Full, TITAN Partial, TITAN Thumb)

1. If using a silicone socket, apply a small amount of water to dampen limb and push on prosthetic socket to limb.
2. To flex finger, apply pressure to back side of fingertip and push to desired location. To extend finger back, pull on fingertip to dislocate pin and reposition to desired location.
3. New users should start with a wearing schedule and ease in to a full day of use.
4. To remove prosthetic socket from limb, pull on socket to remove or consult with your prosthetist or therapist on proper technique.
4. Clean daily with fragrant free anti-bacterial wipes. Consult with your Doctor and prosthetist on preferred cleansing wipe.
5. Prior to patient receiving the device, LOCTITE 242 should be applied to all screws.
