

Heather Dutton was appointed to the Colorado Water Conservation Board in 2017. She grew up on a potato and barley farm in the San Luis Valley of Southern Colorado, where she gained a love for the outdoors.

Heather is fortunate to work as the Manager of the San Luis Valley Water Conservancy District. In this role, she manages an augmentation program for domestic, commercial, and municipal wells in five counties of the San Luis Valley. One of the greatest rewards of this position is the opportunity to work with friends in the water community to find creative ways to manage water and natural resources in the Rio Grande Basin.

Heather previously worked to improve the health of the Rio Grande as the Director of the Colorado Rio Grande Restoration Foundation and the Rio Grande Headwaters Restoration Project. She now serves on the Board of the Colorado Rio Grande Restoration Foundation in addition to the Boards of the Rio Grande Watershed Conservation and Education Initiative and the Rio Grande Watershed Emergency Action Coordination Team.

Heather earned a Masters of Agriculture and Bachelor of Science Degrees in Natural Resources Management and Rangeland Ecology with a concentration in Restoration Ecology from Colorado State University. She is happiest when exploring the surrounding mountains on foot, bikes, and snowmobiles with her husband, Tanner.
