

# Air-Electric Service Station

P/N 10264

## Installation Instructions

1. Use Air-Electric Service Station centered on the back of the Power or Idler column as a template to mark mounting holes (use bottom set of bracket holes).
2. Drill two holes  $\frac{1}{4}$ " diameter.
3. Tap holes  $\frac{5}{16}$ "-18NC.
4. Mount Service Station with provided hardware.
  - (2)  $\frac{5}{16}$ "-18NC Phillips Pan Hd Screw x  $\frac{3}{8}$ " Lg.
  - (2)  $\frac{5}{16}$  Split Lock Washer

**IMPORTANT:** The hole locations are critical to avoid interference with the carriage slide blocks. Use hardware listed above to avoid interference with the back of the carriage.
