EASY SPRING PLUS

Safety First. Safety Last.

Eliminate dangling cords for shade widths up to 144".

Child and pet safety comes first. That's why our new Cordless Spring Roller System is built with our highest standards for safety and endurance in mind. Fabricate shades up to 144" wide without the need for dangling cords, and have a great alternative to manual shades using a clutch.

What's more, no messy cords mean your windows will appear neater—and more attractive. Ideal for small and large shades in homes, offices, RVs, yachts and other recreational vehicles.

SPECIAL FEATURES

- Eliminate the risks posed by dangling cords and offers increased safety for children and pets
- Durable and reliable
- Fewer parts therefore easy to assemble
- Can use 1-1/4" or 1-1/2" tubes
- Single and Dual options
- Adjustable wheels on brackets allow adjustability without removing the shade
- Sleek appearance

CORDLESS SHADE SYSTEM

ROLLEASE LINK SYSTEM BRACKETS

Hanging Multiple Shades is as Easy as 123.

More versatility. More compatibility. Even with multiple shades.

Hanging multiple sets of shades just got easier with our new link system brackets and bearings. Now link up to three shades—and operate them all smoothly—using one clutch or motor. All this means you'll be in total control of your room's lighting. For home and commercial applications.

Compatible with:

Over 8 Skyline Bracket types, select R-Series, Dual brackets and 5" Fascia.

Control light gaps. Get wider clearance from the wall. Enjoy more options.

SPECIAL FEATURES

- Allows for variable clearance from wall
- Choose between bearing types for pin-to-pin or Infinite Adjuster connections for more versatility
- Minimal light gap
- Used with our WCMA winner for Product Innovation: the Infinite Adjuster

SKYLINE SL15 CHAIN DIVERTER & COVER

The Wait is Over. Now Get More Clutch Options With the 3" Fascia.

Our clutch options have grown—to accommodate the Skyline SL15 Clutch.

Once again, RollEase makes design easier: Now there's no need to purchase a SL20 clutch when hanging up heavy shades with a 3" Fascia. The new Skyline SL15 is just as effective in holding up an 18 lb. shade on a 1" tube with a very smooth pull force—without the added cost of a SL20.

Plus you can now use a diverter and cover that allows the use of the Skyline SL15 Clutch in the 3" Fascia System.

SPECIAL FEATURES

- Offers smooth and effortless operation even for heavy shades
- Easily adapts to a variety of tube sizes
- Makes the SL15 compatible with the 3" Fascia
- Easy to use
- Cost-effective and convenient

Compatible with:

1", 1-1/8", 1-1/4", and 1-1/2" tubes

Available Now: A Complete Selection of Options For 5" Fascia.

New flexibility in shade-building. With less inventory.

When it comes to window coverings, you have more options now than ever before when fabricating a 5" Fascia system. Our new insert plates and select accessories can now be used with our R-Series product line. We also offer a motorized version—compatible with the Somfy 500 Series Star Head Motors.

All perfect for creating the setup you have in mind... but now for R-Series and motorization users.

SPECIAL FEATURES

- Available in Single and Dual Versions
- Works with existing Skyline 5" Fascia panel, base brackets and end caps
- Motorized insert panel compatible with the Somfy 500 Series Star Head Motors
- Offers tremendous versatility

With a clean design and simple assembly, you'll find that the Fascia 5" System is an elegant solution for large spaces. Available in 16' lengths; choose from white, bronze or anodized.

The Newest Addition to Our Fabric Offering: SierraSol.

Our elegant fabric collection for total light blocking.

We've made light blocking better. For complete room darkening—along with energy savings, privacy and ultimate style—our exclusive blackout fabric collection delivers on a high-quality look and feel that seamlessly fits in with any décor. The SierraSol line is designed to reduce solar heat gain and glare, while blocking harmful UV rays.

SierraSol works nicely with a variety of window coverings—including Roller shades, Roman shades and Panel tracks.

SPECIAL FEATURES

- White backing provides a uniform color to the exterior, increasing visual appeal
- Acrylic foam coating gives it a bounce back quality for better tracking on roll
- Reduces solar heat gain and glare for increased energy savings and comfort
- Conveniently order cut yardage (3 yard min.) in all colors and roll widths to make smaller jobs cost-effective

SierraSol is available in two collections:

MESA

This blackout fabric offers a high-quality, soft appearance to add beauty to any room, while maintaining privacy. Available in 8 popular colors.

VISTA

A Jacquard weave and subtle color contrast that offers differentiated styling to complement any interior décor. Available in 6 beautifully textured earth tones.

You asked. We delivered: An inspiring new product lineup for 2013. Components. Fabrics. And systems. All offering industry-leading quality and superior, smooth performance.

About RollEase

- Now available! All new products and systems for 2013. We continually strive to introduce new and improved products to make it easier for our customers to fabricate and install shades.
