CITY OF SHEPHERD-SERVICE AGREEMENT

- I. PURPOSE, The City of Shepherd is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The utility enforces these restrictions to ensure public health and welfare. Each customer must sign this agreement before the City of Shepherd begins service. In addition, when service to an existing connection has been suspended or terminated the water system will not reestablish service unless it has a signed copy of this agreement.
- II. **PLUMBING RESTRICTIONS.** The following unacceptable plumbing practices are prohibited by State regulations:
 - **A.** No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system airgap or an appropriate backflow prevention device.
 - **B.** No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an airgap or a reduced pressure-zone backflow prevention device.
 - **C.** No connection which allows water to be returned to the public drinking water supply is permitted.
 - **D.** No pipe or pipe fitting which contains more than 0.25 percent lead can be used for the installation or repair of plumbing at any connection which provides water for human use.
 - **E.** No solder or flux which contains more than 0.2 percent lead can be used for the installation or repair of plumbing at any connection which provides water for human use.
- III. **SERVICE AGREEMENT**. The following are the terms of the service agreement between the City of Shepherd and customer.
 - **A.** The City of Shepherd will maintain a copy of the agreement as long as the Customer and/or the premises are connected to the water system.
 - **B.** The Customer shall allow his property to be inspected for possible cross-connections or other unacceptable plumbing practices. These inspections shall be conducted by the City of Shepherd or its designed agent prior to initiating new water service; when there is reason to believe that cross-connections or other unacceptable plumbing practices exist; or after any major changes to the private plumbing facilities. The inspections shall be conducted during the City of Shepherd's normal business hours.
 - **C.** The City of Shepherd shall notify the Customer in writing of any cross-connection or other unacceptable plumbing practices which have been identified during the initial inspection or the periodic reinspection.
 - **D.** The Customer shall immediately correct any unacceptable plumbing practice on his premises.
 - **E.** The Customer shall, at his expense, properly install, test, and maintain any backflow prevention device required by the City of Shepherd. Copies of all testing and maintenance records shall be provided to the City of Shepherd.
- IV. **ENFORCEMENT.** If the Customer fails to comply with the terms of the Service Agreement, The City of Shepherd shall, at its option, either terminate service or property install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the Customer.
