

Multiple payment solutions you need, from the one company you can trust.

TSYS® TransIT Platform is your choice for securing, interfacing, switching, processing and supporting the payment solutions your business needs.

With TSYS TransIT, you have a variety of solutions to help run your business including:

Merchant Center:

An easy-to-use back office system giving office staff access to all payment processing reporting and administrative functions.

TSYS MultiPassSM:

A comprehensive Application Programming Interface (API) delivering to the merchant a library of business, system and financial services.

TSYS Hosted PaymentSM:

A solution allowing merchants to accept payments simply, while maintaining the look and feel of their website or software application.

TSYS WebPassSM:

A virtual terminal for merchants accepting card-present, mail, or telephone orders needing a powerful secure internet payment processing solution with an easy-to-use interface.

Mobile Payment Acceptance (MPA):

Mobile device based payments application enabling the acceptance and processing of card payments anywhere cellular or WiFi service is available.

TSYS Secur-ePayment (TSEP):

A payment solution allowing merchants to accept e-commerce payments without storing customers' confidential card data.

Choose a processing platform offering you payment solutions you need. Choose TSYS TransIT.
