

Association Connecting Electronics Industries

IPC J-STD-001E/F CIS certification and recertification available at discount prices!

These days, many electronic customers are requiring IPC certification from their manufacturers. With the state of the current economy, it can be difficult to afford training costs to meet these requirements. We are excited to offer IPC certification at a lower cost and, in addition, we will travel to your location to rid you of the burden of out-of-pocket travel expenses*. We also offer a flexible schedule; we work around you instead of you having to schedule around difficult class times. Here is what we offer:

IPC J-STD-001E/F CIS Certification (2-4 days) \$650.00/student

IPC J-STD-001E/F CIS Recertification (1-3 days) \$500.00/student

IPC J-STD-001E/F CIS Challenge Certification (1-2 days) \$650.00/student

IPC J-STD-001E/F CIS Challenge Recertification (1 day) \$500.00/student

- ❖ Prices reflect a minimum of 4 students, though a smaller class size *is* negotiable, with a maximum of 12 per class.
- ❖ All students will receive a J-STD-001E/F certificate upon completion within 2 weeks.

A 10% DISCOUNT WILL BE GIVEN ON CLASSES OF 10 OR MORE!

*We currently travel to MN, IA, WI, and SD.

We look forward to hearing from you. Please contact us for a quote, today!
