

Z-2000™

Modulating Zone Control

The Z-2000 is a commercial zone control system that allows a single HVAC unit to have up to 20 individual zones. Each zone is controlled by its own space thermostat and a modulating zone damper or diffuser. The Z-2000 works with single-stage, multi-stage, or heat pump systems and has an auxiliary heat control option for each zone. The Z-2000 is an affordable alternative to higher cost VAV systems and there is no programming required. The Z-2000 system is now compatible with the Web Comfort Energy Management System, allowing control and monitoring of the zoning system through the Web Comfort portal.

Features and Benefits:

- Integrates with the Web Comfort Energy Management System for remote control, monitoring and reporting via the Internet
- Fully modulating
- Up to 20 zones
- Auto changeover
- Works with single-stage, multi-stage and heat pump systems
- No programming required
- Auxiliary heat control option for each zone
- Night setback option
- All low voltage wiring
- LED status indication of equipment and zones
- Fused inputs and outputs

Warranty: 5 years
