PREMIX WITH ISOLITE®CG

The following information is presented as a general guide regarding ISOLITE® usage in topdressing mixes.

Usage rates for pre-mix requirements have varied depending on soil conditions and individual needs of the superintendent. In general, the following usage rates can be used as a guide for your needs.

CORE AERIFICATION:

(Assume 40 cubic yards of topdressing material required)

- 10.0 % ISOLITE® --- 3 - 1,100 pound Supersacks
- 13.5 % ISOLITE® --- 4 - 1,100 pound Supersacks
- 17.1 % ISOLITE® --- 5 - 1,100 pound Supersacks
- 20.8 % ISOLITE® --- 6 - 1,100 pound Supersacks

NEW GREEN/TEE CONSTRUCTION:

(Assume 37 Cubic Yards/1,000 Sq. Ft.: 12" Root Zone Mixture)

(ISOLITE Pre-mixed in top 6" of Root Zone Mixture)

- 5.0 % ISOLITE® --- Approx. 4 - 1,100 pound Supersacks
- 10.0 % ISOLITE® --- Approx. 7 - 1,100 pound Supersacks
- 15.0 % ISOLITE® --- Approx. 11-1,100 pound Supersacks
- 20.0 % ISOLITE® --- Approx. 14-1,100 pound Supersacks
