

Research Study, Protocol Development, and Data Analysis Experience

- Topical diclofenac in the management of actinic keratosis
- Topical imiquimod in the management of actinic keratosis
- Topical therapies for treatment of actinic keratosis
- Oral antiviral therapy for the treatment of herpes zoster
- Topical metronidazole in the management of rosacea
- Role of skin care in the management of rosacea
- Azelaic acid gel in the management of papulopustular rosacea
- Azelaic acid foam in the management of papulopustular rosacea
- Anti-inflammatory (subantimicrobial) dose doxycycline for papulopustular rosacea
- Subantimicrobial dose doxycycline versus antimicrobial dose doxycycline for the treatment of papulopustular rosacea
- Topical azelaic acid vs topical metronidazole for the management of papulopustular rosacea used in combination with oral doxycycline therapy
- The effect of azelaic acid gel on serine protease activity and cathelicidin in patients with papulopustular rosacea
- Subantimicrobial doxycycline therapy used as monotherapy or as add-on therapy for the treatment of papulopustular rosacea
- Topical alpha-adrenergic receptor therapy for the treatment of persistent facial erythema of rosacea
- Topical ivermectin in the management of papulopustular rosacea
- Topical tretinoin microsphere gel in the management of acne vulgaris
- Clindamycin-benzoyl peroxide gel alone or in combination with adapalene gel for the treatment of acne vulgaris
- Prevalence, presentation, and severity of truncal acne vulgaris
- Adapalene-benzoyl peroxide gel in the treatment of acne vulgaris
- Stability of clindamycin-tretinoin gel in the presence of benzoyl peroxide and in the presence of ultraviolet light
- Stability of tretinoin micronized aqueous gel in the presence of ultraviolet light
- Reduction of truncal *Propionibacterium acnes* using short contact therapy with benzoyl peroxide 9.8% foam
- Dapsone gel in the treatment of adult women versus adolescent girls with acne vulgaris
- Oral isotretinoin (Lidose formulation) in the management of recalcitrant nodular acne vulgaris
- Use of sebashells and physical device therapy for treatment of acne vulgaris
- Red light and blue light therapy for treatment of acne vulgaris
- Role of designated skin care in the management of acne vulgaris
- Clobetasol propionate spray in the management of chronic plaque psoriasis
- Desoximetasone spray in the management of chronic plaque psoriasis
- Etanercept in the management of chronic plaque psoriasis
- Topical betamethasone dipropionate-calcipotriene in the management of psoriasis
- Oral apremilast for the treatment of moderate severity chronic plaque psoriasis
- Role of epidermal barrier maintenance and repair in the management of atopic dermatitis
- Topical therapy for atopic dermatitis
