| Complaint Details<br>Raw seafood, frozen mushrooms, burnt steak, Prime rib old possible red dye not same inside  |                    |
| Action Taken   | Follow-Up Date     |
| Disposition  | Action Required By |
| Comments<br>Investigation of seafood, mgr states shrimp is cooked 3 mins aside till cooked white. Vegetables are placed on stick then cooked on grill. Prime rib is held in an alto sham at 140 F then seared before serving. Steaks are checked using a probe thermometer. Did not see any violations at time of inspection, and the GM and MIT who the complainant ad delt with were not there to question. I told manager that he should temp thicker shrimp to make sure it has reached the proper temp of 145F. |                    |
