

The use of biometrics is a highly accurate way of recording who is present at a given time. Cayen Systems' biometric solutions utilize a biometric scanner connected to a robust, web-enabled software system.

Biometric solutions (both scanner and web system) can be useful in numerous ways.

Possible Use	Biometric Scanner	Web System
Tracking attendance and program hours	Record attendance hours	Programs and sessions set up; generate attendance reports
Tracking attendance and measuring accomplishments in training etc.	Record attendance	Record accomplishments in participants' record
Schedule and record volunteer hours	Record volunteer hours	Schedule Volunteers and maintain contact info; generate attendance reports
Set schedule requirement (e.g. Tuesday/Thursday) and track completion of a series	Record attendance – attendance can be viewed in web system to show if all parts of a series were attended	Set schedule requirements (e.g. Tuesday/Thursday); generate attendance reports
Participation in homeless veterans program for purposes of federal or state reimbursement for services	Record which vets are present and when	Programs and sessions set up; generate attendance reports
Employees for staff attendance	Record when employees come and go	Generate attendance reports

Two kiosks at America Works headquarters cost under \$10,000

There are various ways we can help a program take advantage of the time-saving and accuracy- enhancing benefits of one of our biometric solutions. We are happy to consult with anyone with an interest.
