207-832-0519

Website: www.woodenscreendoor.com

Email: customerservice@woodenscreendoor.com

Wooden Screen Door Company is proud of the quality of the materials and methods we use to construct our custom wooden screen/storm doors. Everything from expansion, contraction and the species of the wood, to straightness of grain, thickness of wood, finishing treatments and hardware has been considered for quality and durability. From the design to milling, assembly to shipping, quality and pride are instilled into everything we do to manufacture our doors. We are confident that you, our customer, be thrilled with the quality and workmanship that is evident in these unique, custom wooden screen/storm doors.

Doors are built to size so that your new door fits your casing properly and complements your home. Seasonally, we offer stocked, standard screen door sizes and designs. Please feel free to inquire about availability.

We offer many different styles and designs to complement your home or place of business.

Whether it's Traditional, Victorian, Classic or Whimsical. We have much to offer any decor or architectural design. We also welcome your design ideas for a completely custom and unique style door, all your own!

Wood

All combination screen/storm doors are built of solid premium mahogany wood, selected for resistance to moisture and decay and stability in extreme temperature changes.

Joinery

Door depth is 1 1/16" thick. Mortise and tenon, glued and pegged joinery throughout its construction ensures strength and durability.

Finish: Primed/White

Doors are produced primed in white, using a shellac-based primer, at no additional cost. Optional unprimed/bare wood finish is available, at additional cost.

Finish: Unprimed/Bare Wood

If unprimed /bare wood finish is selected, additional cost per door covers additional labor and material costs to select clearer grain and use of board feet. Please consult the price list for current pricing.

Clips

Screen and glass panels are held in place by solid brass clips installed for you in the interior face of the door. Each brass clip is machined for heavy-duty use.

Screens

All doors include screen panels. Wooden Screen Door Co. uses the highest quality charcoal aluminum screening to prevent oxidation. Screening is stretched into anodized aluminum frames available in your choice of white or brown finish. Optional screening available: fiberglass, pet screen and bronze screen available at additional cost.

Storm Panels (Optional)

All doors are constructed for use as combination doors, so we recommend fully interchangeable tempered glass panels to provide light and protection, allowing for more functional year-round use.

Storm panels are built to order; thus to ensure the best fit, it is recommended you order storm panels when you order your door. Frame choices are available in white or brown finish.

**Saving Energy
Is Beautiful**

Dress up your house when you button it up with a Storm Door from the Wooden Screen Door Co.

Ordering Instructions

1. Select a Style

Function as well as design should be considered. Pets, children, high traffic areas and architectural highlights may help define what elements are necessary in your door choice. Horizontal rails and brackets help to provide additional support around the handle area. A horizontal center rail also offers split screen and glass panels offering more versatility, thus allowing you to keep glass in the bottom and screen in the top.

Customization

- Cutouts: Generally, cutout silhouettes can be interchanged between door styles ... Please feel free to inquire. Consider a custom designed cutout to complement your architecture or show your personal style.
- Rails & Brackets: Rail heights can be adjusted to complement your interior door. When requesting this modification, consider the overall balance of the door design.

** Additional charges apply for customization of standard designs. Please consult price list.*

**All design information is based on an "outside view" and measured from bottom of door, up.*

2. Measure the Door Opening

Measure the inside edge of the casing area where you will hang your new door. Measure width and height in inches. This is the "opening size." With this, we will construct your door slightly smaller to fit the opening properly ... -or- you can measure the current storm/screen door that you are replacing IF it fits properly. Be as accurate as possible with your measurements. In some cases, it might be desirable to hire a carpenter to check your casing and do any measuring needed.

3. Select Optional Components

Quality glass storm panels and door hardware are all optional components that enhance the door performance. Be sure to consider the same elements for optional components as for selecting the style/ design of the door, such as pets, children, traffic and weather.

4. Crating & Shipping vs Pick-Up

We can crate and pack your order to be shipped by common carrier or air freight direct to you. Crating costs are extra. Additional fuel charges may apply at time of shipping. Freight is shipped "Freight-Prepaid" and included in your WSD order total. Maine State Sales Tax does not apply to orders shipped out of state. We reserve the right to choose the carrier of choice depending on your location, weight of the shipment, etc.

If you would like to pick up your order at our shop, Maine State Sales Tax will apply. Doors are not crated or wrapped for pick-ups. We will be happy to assist you in loading your doors into your vehicle. Please be advised, for better protection it is best to transport the glass and screen panels inside your vehicle.

5. Order

Call us for a quote over the phone, if you need assistance, or fill out the order form included in this catalogue. You can pay by Visa/MC or mail a deposit check with your order. A minimum deposit of 50% of the order total is requested at time of order. Order confirmations are mailed upon receipt of deposit. You can even view this material online at our website:

www.woodenscreendoor.com. A printable order form is available online, as well. All production lead times are approximate and dependent on season and will be noted on your order confirmation.
