

UltraClot® One Step Compact

Z-Fold Hemostatic Gauze with Compression Bandage

- Provides a one step treatment
- Reduces treatment time
- Eliminates need for extra compression bandage
- Prevents rebleeding

Indications for Use: As a sterile hemostatic dressing for emergency external use and temporary wound treatment to achieve hemostasis in cases of moderate to severe bleeding

How it works

1. Gauze is packed into wound
2. Direct pressure is applied
3. Clot forms rapidly
4. Bleeding stops
5. Compression bandage is wrapped and locked in place

Applications

- Military
 - Police
 - EMS
 - First Responders
- FDA K082601
 - US Patents 8409629
8609129
9474652
