

OUR COMMITMENT TO QUALITY

We understand a high-quality project is achieved through a combination of quality design, an effective work plan, using the right tools and equipment, a comprehensive team-wide understanding of quality expectations and having the appropriate quality controls in place to measure the caliber of work.

It is our responsibility to ensure proper materials and equipment are furnished and used, competent workmanship is provided, and all contractual requirements are met.

We believe quality is a continuous process requiring the commitment of all project team members, and that it is planned and built into a project. Our team tracks quality issues, utilizes inspection checklists, monitors all safety and tracks equipment installation status as it relates to commissioning. The process is streamlined, efficient and effective – allowing issues to be identified in advance and resolved before any problems occur.

OUR CORE VALUES

These are the five core values that we live by:

SAFETY

To most contractors, safety is a constant challenge similar to other aspects of running a successful business. However, there's a big difference in how a company thinks and behaves when safety is a value as opposed to just a program or a customer requirement. A company that has safety as a core value has a safety culture. This means that safety has become a way of life and this is what sets us apart from all of our competitors. At Geared Mechanical, Safety is our top priority and the center of our core values.

QUALITY

Choosing the best people for our work, employing the best available practices, and always challenging ourselves to improve through innovation, strategic-planning, collaboration and teamwork.

LEADERSHIP

Means leading with clients and leading with people. Leadership in our business is defined by courage, personal integrity, and having a vision which inspires and motivates others.

TEAMWORK

Together everyone achieves more. We support productive teams that share common goals, a common vision and work in an unselfish manner. As a team, we are driven by collaboration, respect, communication and accountability while recognizing that everyone has their own unique role that must be respected and appreciated.

RELIABILITY

Geared Mechanical is an expert. We have a reputation to maintain as a reliable partner that customers and personnel alike can count on.

OUR COMMITMENT TO SAFETY

Geared Mechanical is committed to providing a safe working environment for all of our clients, our employees and the public. We know that everyone deserves to work in a place that is free of hazards and to be provided adequate safety equipment in order to eliminate worksite accidents.

Unsafe working practices by individuals and companies can often lead to accidents, even in safe environments. Geared Mechanical provides ongoing training to all employees, ensuring that each individual understands that he or she is responsible for contributing to the overall safety on each job. We offer jobsite safety audits, on-site training, and computer based safety training among many of our safety services.

OUR SAFETY PROGRAM:

- Full-time ex-OSHA safety director and OSHA trained project management team.
- Comprehensive computer-based training accessible to all employees.
- Extensive safety training for all Geared Mechanical supervisors.
- Extensive 3-day new hire orientation
- Real-time, daily and weekly jobsite inspections with documentation.
- Pre-job and pre-task planning with safety director, superintendents and project manager staff.
- Daily toolbox safety meetings
- Prompt and thorough investigations of every loss to determine cause and take corrective orders.
- Pre-hire, random and post accident drug testing for all Geared Mechanical workers.
