

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 8.1.59 In Customer Maintenance, the background of the Contract Pricing button, Vendor Pricing button and Cost Plus Pricing buttons are Green if any of these pricing options are in effect. Now you will know at a glance any special pricing for the selected customer.
- 8.1.56 New options in the Liquor File Import that will display all the Items to Update and allows selecting all or only specific Items to update. Also an option to print shelf labels only and not update the prices. This allows printing the shelf labels ahead of time in preparation of the liquor price update. The Liquor Pro Management System has an icon on the main screen to go directly to the Liquor Import.
- 8.1.50 New options in the Service Module to allow editing of the Service Screen List and additional data available in the Service Item fields.
- 8.1.47 Multi-Site Log Report is now available from the Multi-Site Reports Menu to allow viewing of the status of files transferred to and received from remote locations.
- 8.1.44 New EBT payment option from the Invoicing Screen similar to the Cash Tendered option to make EBT payments from the Invoicing Screen in fewer steps, speeding the transaction process.
- 8.1.42 Additional Address fields in Vendor Maintenance for International Vendors to print on purchase orders.
- 8.1.40 New field in Vendor Maintenance to enter the vendors web address and then click to visit the web site. Also available to link to during Auto Purchase Order, Manual PO, Edit & Receive PO and Receive PO Miscellaneous.
- 8.1.37 In Price Schemes, you can now Select multiple items at a time to add to a price scheme when using the "Browse to Add Items to Scheme" button. This uses the same Select option now found throughout the system for selecting multiple items.
- 8.1.36 Item Barcode printing has an option to assign a discount to the barcode label. This can be used for items approaching expiration to discount them by a percent. This label can then be placed over the items normal UPC barcode and when scanned at your register will automatically be discounted and decrement inventory. The same items that are not approaching expiration and that do not have this label will be sold at the normal price.
- 8.1.35 New option to complete and Cash the Transaction Out from the invoicing screen without clicking on the "Total" button, reducing the number of keystrokes and expediting the transaction. Using your keyboard or the on screen keyboard, you can enter the Cash Tendered amount and then click the "Cash Tendered" button that you can create in Menu Button Maintenance. When creating the button, enter a Dollar Sign (\$) in the SKU field. If a dollar amount is not entered before clicking the Cash Tendered button, the transaction will be completed as if the exact change was given. In addition to a Dollar

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

Sign (\$) for the SKU field, you can also program buttons with specific Cash Tendered amounts: \$1 \$5 \$10 \$20 \$50 or \$100.

- 8.1.12 NEW Direct Interface to CARD CONNECT, ELECTRONIC PAYMENTS and CLEARANT CREDIT CARD Processing.** This new interface provides low credit card processing fees and enables merchants to save a considerable amount of money on their credit card processing cost without the additional cost of Net Epay. In addition it uses a new technology called Quick Chip on the credit card machine reducing processing times from about 15 seconds per transaction to 2 seconds and since they have a network interface, they are not dependent on any one machine being available. This means they will even work in Stand Alone Mode and when your Internet is not available with Dial Backup.

8.1.1 VERSION 8 RELEASED! All new look on invoicing screen. Programmable buttons can be double wide, double high or both.

- 7.12.9** Hourly Sales Report has an option to include the Cost and Profit on the report and the option to reprint the report in a 40 Column (Receipt Printer) format.
- 7.12.8** Option in Management Utilities | Station Settings Global on the Closeout / Other Settings tab to include the Gross Profit on the hourly sales report.

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.12.5 Check Box Option in Inventory Maintenance to flag an Item that the Sale Price includes sales tax (Tax Included). An Item that sells for \$10.00 with tax included selected will be priced at \$9.43, sales tax at .57 with an invoice total of \$10.00.**
- 7.11.44 Printing Damaged Return Tags will not print multiple Tags if multiple Items are Returned.**
- 7.11.39 Lotto Report has an option to print in a 40 column (receipt printer) format and will group the lotto tickets by dollar amount.**
- 7.11.33 Change to Accounts Payable check printing of text on checks.**
- 7.11.26 Changes to Physical Inventory Entry during update to also create a General Ledger entry for the General Ledger module.**
- 7.11.22 Changes to Daily / Hourly Pricing to allow simultaneous hourly prices to overlap.**
- 7.11.18 Changes to the Time Clock order entry screen to include Touch Screen data entry.**
- 7.11.1 Improved look and resizing algorithms for faster performance.**
- 7.10.29 New option to calculate "Double Points" for EBT Double Points program and either redeem or use as a payment method. In Department Maintenance you can select which Departments are eligible for the Double Points program.**
- 7.10.22 Bottle Return / Refund report has an option to print on the 40 column receipt printer.**
- 7.10.9 Changes to the Advertising Display to display images with more uniformity. Images will now also be updated as soon as changes are made in Advertising Display settings on the Management Utilities menu.**
- 7.10.1 New feature in the Inventory lookup screen during Purchase Orders has a check box by each Item allowing the selection of multiple Items while on the Inventory Lookup screen. After completing your selection and then pressing the Select button, all selected Items are transferred to the Purchase Order.**
- 7.9.54 New Option to Email the End of Day Report and/or the Sales by Department Report to multiple email addresses during a closeout.**
- 7.9.47 New Option in the Liquor Price Import to print Shelf Labels to the Barcode Printer and the option to ONLY update selected Prices if the new calculated price is greater than the existing current price.**

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.9.44** New Option in Station Settings Local on the Backup / More Settings tab to display the Discounted Net Price for each line item on the Sales / Invoicing screen in addition to the Original Price and the line Extension.
- 7.9.42** New Option in Station Settings Local on the Closeout / Other Settings tab to not allow a Shift Change / End of Day Closeout if there are Open Orders.
- 7.9.38** Sales by Department Reports have the option to print to the 40 Column Receipt Printer.
- 7.9.31** The End of Day Report that prints to the Receipt Printer will now only print data that is not zero making the Reports much shorter and only printing relevant data. For example if there is no Tax 2, it won't print.
- 7.9.29** During Shift Change / End of Day Close Out the Sales by Department report now includes the Sales Tax totals.
- 7.9.21** New feature in the Inventory lookup screen during Invoicing has a check box by each Item allowing the selection of multiple Items while on the Inventory Lookup screen. After completing your selection and then pressing the Select button, all selected Items are transferred to the Sales Screen for Invoicing.
- 7.9.19** Check Box Option in Station Settings Local to "Display the Margin % for the Invoice Total" while Invoicing on the Sales Screen.
- 7.9.14** New Discount option on Invoicing screen to Discount using Cost Plus a percentage. Hot Key is "DC,%". Apply to a single line item or all line items.
- 7.9.10** New option in The Multi-Site Inventory Transfers to Create an Invoice to the Location that the transfer was sent to. This also flags the Transfer at the Central Location as a Drop Ship so the Inventory doesn't get decremented twice. Turn this feature on in System Settings Global on the Multi-Site tab.
- 7.9.3** Check Cashing Module can now add, view and list the Check Issuer.
- 7.9.0** Release of the new "Vape Shop Pro Management System".
- 7.8.91** New Formula option (FM) to calculate formulas, print labels and decrement inventory for Vapor Formulas.
- 7.8.85** Option in Employee Maintenance to "Create a 15 Minute Password" and assign a security level to it that can be given to any Employee and used with any Employee ID to temporarily override their security level. This password is valid for approximately 15 minutes (plus or minus 7 minutes of workstation date and time).

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.8.80** Selecting "End Of Day" during an End of Day / Shift Closeout will not only create a backup copy of your data files but will ALSO print a Z-Out End of Day report and Sales by Department report when "Print Z Report at End of Day" is selected in Station Settings (Local).
- 7.8.77** Selecting "Lookup in Upper Case Only" in Station Settings Local will also force Item Descriptions to be in Upper Case.
- 7.8.75** Purchase Order Receive and Receive Miscellaneous both now have the option to import a CSV or SDF invoice file from a vendor in the format selected in the vendor record.
- 7.8.65** The Department List now has the ability to view and edit EBT Eligible, Profit Margin % and Reward Points from the list without having to edit the department.
- 7.8.63** Department Maintenance has an option to define the Margin Percent to calculate for the cost in Inventory History to use for items in this department that do not have a cost providing a more accurate profit analysis. This will override the Margin Percent in System Settings Global for items without a cost.
- 7.8.62** New option to create an Accounts Payable Invoice from the Vendor History screen from Purchase Orders received.
- 7.8.61** Invoicing Total screen has an option to preview an invoice before printing.
- 7.8.59** The Extended Edit Screen in Touch Screen mode during invoicing now has the ability to override the line item description.
- 7.8.54** Receive Data from Portable Data Collector during Receipts and Physical Inventory will also check the additional Alternate Sku's for a match.
- 7.8.45** There is a new Inventory Turns report. This is based on an Items Purchase and Sales History normally in a years time. It includes a definition of how Turns are calculated and explains how the ASH Advanced Auto Purchase Order System can more accurately maintain inventory forecast without any extra effort based on the historical data that is in the system. This system will automatically maintain or increase purchases for high turning items based on demand and, conversely, reduce purchasing and inventory carrying costs for slow turning items.
- 7.8.39** Inventory Rank report now includes an ABC analysis of Inventory Items based on the Pareto principle which states that 80% of the overall consumption is based on only 20% of the total items. It includes a definition of this principal and how to use it for inventory evaluation and explains how the ASH Advanced Auto Purchase Order System can more accurately maintain inventory forecast without any extra effort based on the historical data that is in the system.

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.8.31 The Price Update form has an improved option to update prices by selecting Pricing Criteria from multiple lists.**
- 7.8.27 Restaurant Edition has an improved feature when seating customers from the Table View screen.**
- 7.8.24 Restaurant Edition has the option to lookup by Customers in lieu of Delivery for Customer Point redemption.**
- 7.8.22 Restaurant Edition Hostess Display Screen has new edit features and Displays the server assigned to each table.**
- 7.8.20 Accounts Payable Account Reconciliation has new algorithm to calculate and display data quicker.**
- 7.8.18 Purchase Order edit and receive now has the ability to edit or change the Case Quantity and to order or receive by number of cases. Also can now view all the Vendors for this Item while ordering or receiving.**
- 7.8.12 Support added for a Signature Capture Pad to capture and save signatures for both credit card charges and charge to account payment types.**
- 7.8.1 New Screen Resizer is implemented to resize to Monitor Resolution for faster and more accurate resizing of forms.**
- 7.7.50 The General Ledger Journal Report now has the option to Select just a specific date or journal number to print/view.**
- 7.7.43 There are now an unlimited number of Alternate SKU's that are available for every Item in lieu of just one.**
- 7.7.36 When the Auto Clock Out option is selected, the system will now only scan for previous days not clocked out at one workstation per day.**
- 7.7.35 Item Returns now has the option to return individual lines or display a list of all the items on the invoicing screen and select individual lines or all and whether the items are damaged or not. If a customer is selected it will update the price from their invoice history or an invoice receipt can be scanned or entered and the prices are updated from there.**
- 7.7.31 New option in Customer Statement printing that will show payments received for the current month and invoices that those payments were applied to.**

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.7.28** General Ledger module has an additional default G/L account that can be entered for Cash and Checks / Cash on Hand that does not go directly into the checking account.
- 7.7.23** New support for Signature Capture Pads that can be used to capture a customers signature for both House Charge accounts and Credit Card transactions.
- 7.7.13** When selling cigarettes or liquor that requires you to enter a legal age either manually or by scanning the barcode on the back of their drivers license, the system will now display the legal age on the total screen to allow you to verify that the person that handed you their drivers license appears to be that age. It will also let you know if it happens to be their birthday.
- 7.7.10** Price Check option on Invoicing Screen now also displays all of the Quantity Breaks available.
- 7.7.9** Purchase Order and Receive Purchase Order Miscellaneous line Edit now has the option to view all Alternate SKU's and all Vendors for the selected item.
- 7.7.8** Added VX805 EMV support for First Data (FDMS Rapid), Paymentech, TSYS, Vantiv and Elavon(E2E).
- 7.7.7** A Margin percent can be set in System Settings Global on the Purchase Defaults tab to automatically calculate the cost for the sales history and profit of Items with a zero cost in Item Maintenance.
- 7.7.5** Voiding an Invoice will now show the user id of the person that entered their password.
- 7.7.1** New option to capture the customers signature on a signature pad for house charges.
- 7.7.0** Option to scan the barcode on the back of a drivers license to verify the persons age for liquor and cigarette sales.
- 7.6.31** Option to email all house charge invoices at the end of the day in one batch in lieu of at the time of sale.
- 7.6.23** Purchase Order receipts will now display the quantity per case and all additional vendors per line item when receiving. This also allows updating the quantity per case while receiving.
- 7.6.15** Purchase Order receipts has the option to replace the quantity on hand in lieu of adding to the quantity on hand for each line item while receiving (based on security level).
- 7.6.10** New options added to the ASH CHECK CASHING Module to take advantage of the new drivers license barcode scanning feature. Updates created to include interface

Point of Sale Pro Management System

New Features

Most Current Features are listed first.

capabilities with the new MICR readers, Check and Drivers License scanners, and Video Cameras for capturing the customer picture.

- 7.6.5** There is now the capability to scan the 2D barcode on the back of a drivers license to look up a customer and, if not found, to add all of the customer demographic data to a new customer record including: name, address, date of birth and drivers license number. This option requires a 2D (two dimensional) bar code scanner.
- 7.6.1** Update to option when returning items after scanning the barcode on their receipt that will now automatically check the Return Item flag when the Return Item Damaged is selected.
- 7.5.6** Editing the price, discount, etc. on the invoicing screen while in touch screen mode will now also allow input from the keyboard.
- 7.5.4** Menu Button Maintenance displays the selected buttons menu description, item description, item price, item department and item taxable status. Item price, department and taxable status can be changed from the button edit.
- 7.5.1** Menu Button Maintenance now has the ability to select printers, modifiers and addons for each button. This function has been removed from Item Maintenance.
- 7.4.62** New option during Receive Inventory Miscellaneous to display the current Quantity On Hand and a check box option to replace the Quantity On Hand with zero so that the Quantity On Hand will be updated to the actual quantity received. This option uses the same security settings as editing the quantity in Item Maintenance.
- 7.4.59** New option in Physical Inventory Entry to Fast Add an Item while performing a physical count.
- 7.4.49** Purchase Order Edit has an option to create a Purchase Order in a CSV file format that can be uploaded to International Wholesale. This is selected in Vendor settings.
- 7.4.48** Purchase Order history lookup can now lookup by Vendor, Receive Date and Invoice Number in addition to Purchase order Number.
- 7.4.45** New option to Add a New Item on the fly during Create PO, Edit PO, Receive PO and Receive Inventory Miscellaneous.
- 7.4.43** New option to Add a New Item on the fly during Invoicing if the Item was not found.
- 7.4.34** New Print option in the Scheduler to print schedules by a date range and to only print time slots that are scheduled.

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.4.32 Changes in the Scheduler to include the customer name and address when adding a new appointment from a customer record.
- 7.4.30 When creating a Tickler it can now be sent to multiple recipients in lieu of just one.
- 7.4.28 New logic to reset prices of Items that were on a promo, quantity break, price scheme or buy X member when an Item is deleted or cancelled and the existing items no longer qualify for the promotion.
- 7.4.26 When the Cancel Line in lieu of Deleting Line is enabled, the description of the item will be proceeded with the word "CANCELLED" so you can easily determine which line items on the invoice were cancelled.
- 7.4.24 New alert when adding a new Item using a template to alert if the Item had Promo Pricing, Two Fer Pricing, Three Fer Pricing, Quantity Breaks, Member Only Promo Pricing or is a Member of either of the Buy X Get 1 Free promos. This will alert the user and help to prevent applying promos that were not intended to the new Item.
- 7.4.23 Items on Promotion Report now has the option to include Items that are a member of the Buy X Get 1 Free promos.
- 7.4.22 Distinctive beep for items with a zero price to alert the cashier to enter a price.
- 7.4.2 New **Marble and Granite Management System** released specifically for this industry with features to track production, tag material for jobs, keep track of edges, cutouts, material, dye lot, backsplash, sinks, production checklist, job change orders and printing of many related reports.
- 7.4.1 New logic to calculate totals when recalling an order to enhance the speed of recalling a large order.
- 7.4.0 New algorithms and logic to enhance the speed of scanning items on the invoicing screen.
- 7.3.23 Option in Employee Activity Report and Multi-Site Employee Activity Report to also print by time of day for Employees that punch in and out after midnight.
- 7.3.19 Now have the ability to edit the Invoicing screen columns for each workstation to adjust for different screen resolutions and sizes.
- 7.3.15 Menu button maintenance to reflect the same look of the Invoicing Screen.
- 7.3.5 New option in the Invoicing Options screen to generate several management reports without leaving the Invoicing Screen. Hot Key is "MR" (Management Reports)

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 7.3.1 New option in the Invoicing Options screen to perform an End of Day or Shift Closeout from the Invoicing Screen. Hot Key is "SC" (Shift Closeout)
- 7.2.106 Caller ID option available to display Name and Phone Number of person calling. This will automatically add the customer to your customer file if they are a new customer, or pull up the customer information and purchase history.
- 7.2.87 Multiple new Shelf Label and Shelf Talkers to print in several different formats.
- 7.2.56 New layout for Restaurant Check Transfers which makes it easier to use and transfer.
- 7.2.32 Options to send SMS Text Messages to Customers with Open Accounts Receivable or Open Credit Balance or Credits Earned from the Integrated Rewards program.
- 7.2.0 Support added for Credit Cards, Smart Cards, Debit Cards Proximity and Apple Pay on the new EMV platform.**
- 7.1.50 New **Rewards Keeper** Edition for customers that already have a Point of Sale System but want to take advantage of our Rewards Program for their customer base to generate repeat business.
- 7.1.26 Extended text information available for Tickler Messages.
- 7.1.1 **VERSION 7 RELEASED!**
- 7.0.0 SOON TO BE RELEASED!** In Beta testing now. New look with Icons in lieu of command buttons. Credit card processing to support the new EMV and proximity card processing.
- 6.2.12 General Ledger Report will now only show the date range selected and not include the previous month and quarter balances if "Include Previous Month & Quarter" was NOT selected.
- 6.2.11 Creating an A/P Invoice during Inventory Receipts will now force you to enter an Invoice Number. Changed some of the logic for editing an old invoice.
- 6.2.8 New Security Option to Disable Editing of a Customer record but will still allow viewing of the customer record data.
- 6.2.1 End of Day will now prompt for a "Shift Closeout" or an "End Of Day Closeout". If the End Of Day Closeout is selected, after the closeout is completed, the system will

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

automatically create Emergency Stand Alone files if that is an option at this workstation and then automatically create a local backup and an offline backup, (if the subscription service is selected). There are seven separate backups made both locally and on the internet, one for each day of the week.

- 6.1.160 New option to automatically backup data to the Internet when the Backup Option is selected under the Daily Tasks menu. In addition to making a local backup it will also backup to the Internet. These options are setup in System Settings Global and requires a monthly subscription service.
- 6.1.155 Multi-Site will now add Vendors entered at the remote locations to the Central locations data files.
- 6.1.151 Inventory Rank report has option to also rank by Department or Vendor.
- 6.1.149 Option when reprinting the last or an old invoice to print the credit card signature receipt.
- 6.1.147 New Invoicing Screen Option to do a Member Lookup (ML) for scanning customer member cards without having to do a customer lookup. The hotkey "ML" can also be programmed onto one of the buttons.
- 6.1.144 Option in Customer Maintenance to only automatically apply the customers' default shipping charge to one invoice when multiple invoices or orders are generated on the same day.
- 6.1.143 Added Bin Locations to Price Check screen and Extended Edit screens when editing Invoice line items.
- 6.1.142 Added information in the Reason field of the Edits and Voids report to indicate if Edits, Voids or Discounts were applied before or after an Order was Saved.
- 6.1.141 New option in QuickTouch Restaurant version to combine multiple checks into a single check when printing.
- 6.1.138 Additional Transfer Check buttons in addition to double clicking when transferring tabs.
- 6.1.129 Option to Clear Batch on PAX credit card terminals.
- 6.1.123 Option in Item Maintenance to Reverse the Mater Item Inventory function. The Master Item quantity will be decreased by one (1) AND ONLY one (1) will be added to stock of the Each Item. The conversion quantity is used to calculate the cost of the Each Item.

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 6.1.120 Customer Credit Balance Report now has the option to include Points or Dollars that customers have earned with the rewards program.**
- 6.1.117 New option in Lotto Ticket Maintenance to Increment or Decrement the Roll / Stack ticket number for inventory control of the tickets.**
- 6.1.114 Changes to A/R Customer and A/P Vendor Ledgers to include headings on each page with the Total Customer/Vendor Balances on the bottom.**
- 6.1.112 Changes to the printing of Shelf Labels and Shelf Talkers on 8 1/2 x 11 paper stock with new images and the ability to print 2/\$x.xx amounts with dollar savings. You can also re-use a partially used label stock by selecting which labels on the sheet you want to print to.**
- 6.1.111 New option in the invoicing screen under Cashier/Workstation Options to Add a new Customer Ship To Address and apply it to the Ship To for this transaction in one step. "FS" for Fast add Ship to is the hotkey assigned to that function.**
- 6.1.101 New Touch Screen form for entering Physical Inventory data. This form makes entering inventory items and quantities much easier when using our Touch Screen Tablet with Scanner because the keyboard buttons are included on the form in lieu of using the tablets popup keyboard.**
- 6.1.99 Credit/Debit card processing via the PAX MT30 or SP30 now have an option to override a duplicate transaction amount.**
- 6.1.97 Inventory List screen now includes the Master Item column. The Item List format can be edited in System Settings Global by clicking the Inventory List button.**
- 6.1.92 Generic items such as Beer or Pop that have Prompt for Price checked and Charge Deposit checked and the Deposit amount is 0.00, will now automatically prompt for the Bottle Deposit Amount when that item is selected.**
- 6.1.86 New Daily Reorder Report Option in System Settings Global on the Defaults tab that will create a Reorder Report for Items that are below the minimum required based on the Quantity in Stock, Sales History and Lead Time from the Items Primary Vendor. There is a new report to print by date range in the Reports Menu and this can added to a Scheduled Jobstream to print automatically Daily or by selected Days, Day of Week, etc.**
- 6.1.85 When the option to prompt for the legal age of cigarette and liquor sales is turned on, "Legal Age Verified" or "Over 27 Selected" will print on the bottom of the receipt.**
- 6.1.83 Option in Station Settings Local to display the legal Liquor Age Birth Date and/or the legal Cigarette Age Birth Date on the invoicing screen.**

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 6.1.81 On Credit Card, Debit, EBT and WIC transactions the Receipt will now print "Customer Copy" on the first receipt, "Merchant Copy" on the second receipt and "Duplicate" on any additional receipts. "Reprint" will print on invoices that are reprinted.**
- 6.1.79 New settings to define the number of Credit Card or Debit receipts to print and to define the number of EBT or WIC receipts to print.**
- 6.1.74 New option to Check EBT Foodstamp Balance or EBT Cash Balance and print the balance on the receipt.**
- 6.1.70 Built in option to automatically Batch Out the PAX MT30 or SP30 during the End of Day/Shift Closeout process.**
- 6.1.65 New interface to the PAX MT30 and SP30 EMV compliant IC card (chip card), credit card, debit, EBT, etc. The MT30 also includes signature capture.**
- 6.1.52 Option in Menu Maintenance to print menu screens.**
- 6.1.49 Edits and Voids report now displays the total of voided invoices.**
- 6.1.47 New "AA" Add Alternate SKU option in the invoicing screen to add or change an Alternate SKU to the line item selected. Requires a security level for Inventory Maintenance.**
- 6.1.46 New Shelf Talker option under Inventory Control | Barcode Printing to print a 4 Across Shelf Talker in Landscape mode. Both 4 Across Shelf Talkers will now print the Selected Price and the Two Fer or Three fer pricing if the item has it. Ex: \$ 1.59 or 2/ 3.00**
- 6.1.45 Includes many changes to the General Leger module for operation, reports, financial statements, etc.**
- 6.1.31 New Interface to WIC machines so that when an Item is scanned with the WIC scanner it is also displayed on the Point of Sale screen. This can also be used to keep track of Points Earned for WIC customers.**
- 6.1.23 New A/P Aging Report format for Current, 1-30, 31-60, 61-90 and Over 90.**
- 6.1.19 Can now recall a Customer's History by the Ship To Location.**
- 6.1.14 Order Recall screen can now be edited in System Settings Global to permanently adjust the columns widths and arrangement.**
- 6.1.12 Option when printing an Employee Activity report to print each Employee on a separate page.**

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 6.1.8 New Option when printing an Inventory Price List to print in SKU Order only.
- 6.1.7 New Option in Station Settings Local to Prompt to Update the Selling Price of an Item if it is Changed during Invoicing.
- 6.1.5 Changes to invoicing screen grid to add a column to display an Items Markup Percent. This is not viewable if the options to Hide Cost or there is a Security Option set to view cost.
- 6.1.1 **VERSION 6 RELEASED!**
- 6.0.5 Employee List now includes the employee cell phone number.
- 6.0.4 New Physical Data Entry option from Physical Data Report which is now saved to allow quicker manual entry of quantities from the last Physical Data Report generated.
- 6.0.3 Physical Data Entry from Portable Data Collector and Manual Entry options for updating are now only prompted during the actual Update Phase.
- 6.0.2 New option in Menu Maintenance to turn on a KEYPAD on the main menu or all menus of the Invoicing Screen. This can be used to enter UPC codes, Quantity Amounts and the Price for a generic item in a Department. Example: click 1.25 and then click the Taxable Grocery button, or click 5* Enter and then scan an item for a quantity of 5.
- 6.0.1 Options in Menu Button Maintenance to have a Keypad visible on the Main Menu only or All Menus. Option to have a vertical grid on the POS/Invoicing screen in lieu of a horizontal grid. Menu Buttons normally across the bottom are now along the right side of the screen.
- 6.0.0 **SOON TO BE RELEASED!** In Beta testing now. Navigate via Navigation Menus. Improved and faster creation of PDF files when emailing invoices, purchase orders or statements. Option to Print, Email or Print and Email Receipt/Invoice when finalizing a transaction. New and Improved search and sort algorithms for even faster data retrieval. New background colors, foreground colors and fonts on POS/Invoicing screen and Total Screens for a new look and easier, more intuitive navigation.
- 5.5.24 Time Clock Job Entry now has option to print work order with Clock In and Out times listed.
- 5.5.23 Time Clock has new option to allow adding parts to work order by scanning work order and item bar codes.

Point of Sale Pro Management System

Version

- 4.0.125 Option in Employee Commissions to calculate minimum commission based on the number of hours worked times a multiplier factor.**
- 4.0.120 Aging report for Orders and Layaways by age in days to determine if payments have been made.**

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 4.0.116 Option when finalizing a transaction to prompt for a customers' email address, how heard and first and last name. If the email address is already on file the customer will be selected on all sales applied to their account.**
- 4.0.110 Option to Prompt for a Layaway Fee on original Layaway only when the Layaway is Saved (LA). Option to Prompt for a Cancellation Fee on Layaways (LC). Amount can be overridden if desired. New Items that are automatically created: LAFEE (Layaway Fee) and LACAN (Layaway Cancellation Fee). These Items can be Edited to adjust the Default Fees.**
- 4.0.103 Option to Require that a Customer is Selected before saving an Order.**
- 4.0.103 Option to enable prompting for Email Address and How Heard on the Fast Add Customer form.**
- 4.0.103 Option to enable prompting for Email Address and How Heard during Invoice Total if a customer is selected and either of those data fields are empty.**
- 4.0.102 Option on Invoice Total to Print Gift Receipt and Prompt for Line Items. Also an option to Cancel the Gift Receipt.**
- 4.0.101 Option to enter a default next payment due in number of days is System Maintenance for Layaways. Receipt will print when the Layaway is due for pickup and the next data that a payment is required.**
- 4.0.101 Option during Invoicing to have Tax Included (TI) by line item. This will make the price plus tax extension equal to the original price value reducing the price and tax amounts.**
- 4.0.89 Option for Web Transactions to be Pre-Authorized at time of placing the order and then Post Authorized when the order is shipped.**
- 4.0.83 Interface developed to work with NCR in counter scale / scanners.**
- 4.0.74 Option when saving an Order to capture credit card data and encrypt with 128 bit data encryption until shipped.**
- 4.0.62 Web Order Import deletes Credit Card Data on web when order is shipped.**
- 4.0.50 New changes to the Web Order Processing module to improve data import and updating of email and tracking data that is emailed to your web customers. Also includes 128 bit data encryption of credit card data for users that process the transaction on their local system.**

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 4.0.10** New feature to Import Data from a Unitech Portable Data Collector. These new data collectors have a docking station with a USB interface for use with newer systems that do not have PS2 ports. The Management System controls all of the interface with the data collector including automatically polling the data collector to import new data, deleting the existing file and controlling the length of the UPC/SKU in use on your system. There are two options for collecting data:
- 1) Scan the UPC code and prompt for quantity (the same as the old data collectors)
 - 2) Scan the UPC code and prompt for the quantity, cost and price. If a price and/or cost is entered, the system will be updated with these new amounts when the data is imported.
- 4.0.1** **The Management System Version 4.0 is released.** Version 4 meets all the requirements for PCI Compliancy and is required for any company processing credit card transactions through their computer system.
- 3.8.102** Purchase Order Receive and Purchase Order Receive Miscellaneous both have the option to Receive Data from a Portable Data Collector to update Quantities Received.
- 3.8.100** New option to prompt for and scan credit cards to capture last 4 digits of card if credit card processing is being used through a separate device.
- 3.8.98** During new item entry, UPC-E codes are converted to UPC-A codes. The UPC-A code becomes the SKU and the UPC-E code becomes the Alternate SKU. Additionally, if a UPC-A code is entered and it can be converted to a UPC-E code, the UPC-E code is placed in the Alternate SKU field.
- 3.8.96** Changes to the Electronic Vendor Invoice Compare function to be more flexible for a variety of electronic vendor invoice formats.
- 3.8.92** The Multi-Site Sales by Department has an option to create SPINS sales data in their exact format for transfer to a SPINS account.
- 3.8.88** Sales by Department report has an option to include sales tax and tax totals.
- 3.8.80** Multi-Site Inventory Transfers and Export File now uses the Average Cost in lieu of the Last Cost.
- 3.8.80** Receive Inventory by Scanning will now prompt the operator if the Quantity Received is greater than the Quantity Ordered to allow products to be returned that were shipped incorrectly from the vendor.
- 3.8.80** Two new Promo Pricing options for Members Only with date ranges for each. The Promo File Import now has an option to update the Standard Promo Pricing, Member Only Pricing 1 or Member Only Pricing 2.

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.

- 3.8.75** Golf Shop Pro Management System has an option to enter up to 4 Players for each Tee Time. Scheduler displays all players when the Tee Time is selected and has the options to lookup customers from the customer file, Invoice the customer and display if the customer has paid for their Tee Time.
- 3.8.72** Items with a Master Item will not have their average and last cost updated when the Master Item is received based on the received cost divided by the conversion quantity.
- 3.8.70** The Scheduler now has an 8 ½ minute interval option for Golf Tee Times and prints Tee Time Starter sheets.
- 3.8.65** Employee Activity Report will now calculate times for employees that clock in and then don't clock out until the next morning for evening shifts on the last day of the pay period.
- 3.8.56** Customer Edit now has a "Previous" and "Next" button to scroll through customers based on the order selected in the customer Lookup screen.
- 3.8.55** New Option in System Settings (Global) | QuickCharge Settings to prompt for an Up Charge percent on credit card transactions and add the Up Charge as a Handling Charge on the transaction.
- 3.8.49** New Option in Station Settings Local to "Disable Edit / Receive of Purchase Orders at this Workstation". This will still allow Edit & Receive of Multi-Site Transfers.
- 3.8.48** QuickTouch Restaurant version has an option to add the price for a modifier to the original Item it is modifying. ie: Liquor is \$9.00, an "On The Rocks" modifier bumps the price up to \$11.00. If Price Level E of the original Item is greater than 0, it will use that price to bump the price up.
- 3.8.48** POS / Invoicing screen will now except line item prices up to \$999,999.99.
- 3.8.47** New Check Box option in Inventory Maintenance to set Promos that are only eligible for customers with a current Membership.
- 3.8.46** New Feature in Vendor Maintenance to import data from a vendor disk to your Inventory from a Comma Delimited (CSV) or Fixed Length (SDF) files. Requires setup in the Vendor record.
- 3.8.45** Option in System Settings (Global) to disable the view of the Sales History Window during Inventory Lookup on Purchase Orders.
- 3.8.44** Price Schemes in the Inventory Control Menu now has the option to browse for items to add, manually enter items to add and remove items from a Price Scheme without having to select via inventory maintenance.

Point of Sale Pro Management System

Version

New Features

Most Current Features are listed first.
