# Force on Force Active Shooter Training

There is no substitute for real world scenario based dynamic interpersonal use of force training. This level of training is designed to teach new officers and/or to test existing officer response to an active shooter situation, using Simunition FX law enforcement training products, under the guidance of certified instructors.

# Force on Force Active Shooter Training

- ❑ Training at your location.
- ❑ Instructors Supplied
- ❑ Supplies FX Glock pistols, ammunition and the required safety equipment.
- ❑ This eliminates the high costs associated with time, travel and lodging at a remote facility, and then having to apply the lessons learned back on site.

## ★ SAFE TRAINING ENVIRONMENT ★

Simunition force on force FX training ammunition is now available in a reduced energy non-marking projectile format, as well as a self-contained non-projectile Securi-Blank format thus allowing training to be conducted in a school or corporate environment without the risk of property damage.

This training is both physically and mentally demanding and is offered exclusively to Law Enforcement, Military and Security personnel only.

# COURSES

## ❑ **Active Shooter/Violent Intruder Preparedness and Response Training for Employers**

Specifically created for employers and their teams, this 3-hour presentation will explore the dynamics of typical active shooter situations and discuss current best practices for preparation and response to such incidents.

Workplace violence and “active shooter” situations are becoming more and more of a concern for employers. Equally as concerning, the general public is subject to a lot of misinformation and misunderstanding concerning active shooter situations and what to do if you find yourself in the vicinity of such an attack.

We will examine data compiled from over 230 events to gain a better understanding of the who, what, and how of active shooter incidents and workplace violence. In the second half of the presentation we discuss optimal response strategies and the nuances of their implementation. We will cover preparation and responses for both individuals and employers.

# **Courses for Active/Retired Law Enforcement; Security Agencies; U.S. Military; Current Licensed Armed Security w/Current CCW**

## **☐ Active Shooter Response**

This 3-day advanced level course is designed for the officer whose responsibility includes immediate response to an active shooter situation.

## **☐ Active Shooter Preparedness for Employers**

Specifically created for employers and their teams. This eight hour, interactive presentation will explore the dynamics of typical active shooter situations. The training also will discuss current best practices for preparation and response to such incidents.

## **☐ EP/AOP's**

This 2-day advanced course is designed for the officer whose specific duties include Executive Protection and/or PSD type operations. Topics include methods of physically controlling, covering and evacuating a principal or protectee and engagement of single or multiple threats utilizing both solo operator and multi agent team scenarios. The majority of this course is conducted utilizing insert blue guns and Simunition.

## **☐ Tactical First Aid**

This 1-day intermediate level course consists of certification in basic first aid as well as CPR and AED. It will also include instruction in treating injuries common to LE conflicts such as blunt force trauma and hemorrhage control. Students will be taught how to select and prepare portable first aid kits and how to secure and treat injured officers under fire. In conclusion, officers are put to the test in scenario based situations utilizing Simunition.
