

48, 48 stat 112 is very clearly our public law remedy. Where the ability to pay for anything was removed, as Congress cannot even regulate the difference in value between a \$1 or \$100 in federal reserve notes, because it all still debt, not money. That is why if one were to submit even just \$1, on say an alleged debt of \$10k, if submitted in GOOD FAITH, WITH CLEAN HANDS, it is acceptable as tendered payment. Note for note, dollar for dollar. That is why I have said all along, all it will take to wipe out a \$21 Trillion national deficit, is just \$1 of Gold Coin or Silver Coin. As lawful money can only be the TRUE positive asset/credit to cancel any, Negative charge liability debt. Thanks for sharing, it is nice to see someone else like-minded, who knows public law is law.
