

TRG EDI Connector for Syteline

DATA TRANSFORMATION

Data mapping and transformation between your EDI software and Syteline.

E-MAIL DRIVEN RESULTS

EDI audit reports and exceptions are sent to your inbox.

FULLY AUTOMATED

Can be scheduled to automate processing of inbound and outbound transactions between your EDI software and Syteline.

Turnkey solution that provides seamless EDI integration with Syteline

Supports the following Syteline Demand EDI transactions:

- 850 Purchase Order
- 830 Production Schedule
- 856 Advanced Ship Notice
- 810 Invoice

Full EDI mapping capabilities

The TRG EDI Connector, developed with Microsoft .NET and SQL Server technology, is a web-based EDI data mapping, transformation and transaction management tool. It provides seamless integration between any EDI package that can import/export raw EDI transactions (such as GXS' Trusted Link for Windows) and Syteline.

The TRG EDI Connector has been designed to streamline day-to-day EDI operations and provide key information at your fingertips.

Using email-driven exception and audit reporting, the TRG EDI Connector can be scheduled to provide complete automation of inbound and outbound transactions between your EDI translator software and Syteline.

POWERFUL REPORTS

830 Production Schedule Net Change Report takes the mystery out of schedule changes.

PROVEN RESULTS

TRG has been providing EDI integration with Syteline since 1995.

PROVEN TECHNOLOGY

Developed using Microsoft .NET and SQL Server technology.

TRG EDI Connector Features

Inbound 830 Production Schedule

- Emails inbound summary report by trading partner/PO item.
- Emails Net Change Report detailing exceptions from previously received data.
- All 830 data is retained in the TRG EDI Connector and can be used as turnaround data for outbound EDI.

Inbound 850 Purchase Order

- Emails PO Inbound Activity Report for each Trading Partner detailing incoming PO information as well as any exceptions.
- All 850 data is retained for use as turnaround data for outbound EDI.

Outbound 856 Advanced Ship Notices

- Synchronizes with Syteline Shipments to determine new ASN's to send and can be scheduled to send automatically. No "flat file" processing in Syteline is required.
- Emails an ASN Audit Summary detailing shipments processed.
- TRG EDI Connector has an interface for maintaining ASN data (if needed).
- Can regenerate ASN transactions from TRG EDI Connector.

Outbound 810 Invoice

- Emails an invoice Audit Summary detailing invoices that were processed.
- TRG EDI Connector has an interface to allow regenerating 810 EDI transactions.

Prerequisites

SyteEDI Module is Required

Must have a Value Added Network (VAN) Subscription. TRG recommends the Inovisworks VAN if you do not already subscribe – we can help configure and install GXS/Inovis products.

Must have an EDI translator package capable of importing/exporting raw X12 and EDIFACT EDI transactions. EDI translator must also handle non-integrated EDI transactions such as 997's.

TRG recommends the GXS/Inovis Trusted Link for Windows EDI translator package if you do not own one – we can help configure and install GXS/Inovis products.
