REPLACEMENT CHAIN EQUIPMENT

ABTECH LLC

OVERVIEW: Our standard features reliably constructed and economically designed components that can be incorporated into any clarifier system.

COMPONENTS:

NH-78 Drive Chain – Injection molded for strength and light weight

NC-720-S Collector Chain – Constructed from specially formulated material to withstand high sludge loads

730 Collector Loop Chain – Filament wound, fiber glass side bars, stainless roller and 4,500LB working load

C-Channel Flights and Wear Shoes – Highest stiffness factor in the industry, standard c channels

Cast-Nylon Sprockets and Stub Shafts – Easy slide on design incorporates high-strength material to prevent rust and corrosion

Shear Pin Drive Sprocket Assembly – Prevent system damage with use of a trip pin and limit switch

Return Rail with Brackets - Lightweight components provide cost-efficient alternative to steel

Standard Wear Strip – Allows flights to run smoothly through clarifier

Drive Unit - Custom configured for each collector based on system requirements and conditions

304SS Scum Pipe – Removes grease, scum and floating materials with ease. Manual or electronic actuation

Fab Tech Wastewater Solutions LLC 865 Midpoint Drive O'Fallon, Missouri 63366 400 Travis Lane Unit 30 Waukesha, Wisconsin 53189 EQ Tanks/ Anoxic Basins

Clarifier Drive Rebuilds

Additional Services Offered:

Circular Clarifiers

DAF Units

Aerobic and Anaerobic Digestion

Installation of all Water and Wastewater Equipment

Aftermarket Parts

Stainless Steel Slide and Sluice Gates

Free site Inspections

Custom Stainless Steel fabrication and Welding-formingwelding
