(Buffet 5:30-6:30 Social at 6:30 p.m.)

Coffee: Third Tues. of the month at 5:30 p.m.—check calendar for location

June Director's Message

Carolyn and I couldn't be at the June meeting as we were in California for our Granddaughter's High School Graduation. A big thank you to Dan for standing in for us at the social. I just realized we will miss the June coffee as we will be on a trip to the Ark Encounter in Kentucky with our church group. We hope everyone is enjoying the summer weather so far and are finding time to enjoy a ride or two. Looking forward to getting back with the H2 group. Here is a quick note for filling up the bike.

A Safety Note for Gassing Up The Bike*

The tank is running low so you pull into a service station next to a pump. Down goes the kickstand (for 2- wheelers). The next few things you do could save your life!

- **Turn off your engine.** If gasoline were to spill as you bring the nozzle to the tank, as a result of overflow, or as you take the nozzle out of the tank, you risk setting it ablaze. You should be concerned not just about a hot engine or exhaust pipes but also any electrical system.
- **Take your helmet off.** If your helmet is on, you cannot determine as easily if a fire has started as you can without it on. If the helmet is attached to the bike with an audio system cord, you cannot evacuate the area quickly should a fire be detected.
- **Get OFF your motorcycle** – also your co-rider. For some reason this step seems to be ignored more often than any other. Maybe it "looks" good. Maybe it's just too much work to get off when you're tired. Your co-rider should also be off the bike and in a safe area. Putting fuel into your tank while you're straddling the bike is dangerous! If there is a gasoline spill your crotch will get wet. Then what do you do? What should you do if
 - you spill gasoline on any of your clothes"
 - **Drench** clothes with **water**
 - Then take that article of clothing **OFF!**

IL-H2 www.ilh2.org

- **Do not walk** if there is gasoline on your clothes. Static electricity can easily ignite gasoline fumes.
 - o Allow clothes to dry outside. If you happen to be at home, do not put these clothes into a washer/dryer.
 - o If you can smell gasoline on them, there is enough to ignite.
- **Fill the tank, but not to the top.** Gasoline expands as it warms up. Some gas tanks are not sealed units and if you fill them to the top, they can easily leak. Some motorcycles have dual (side-by-side) tanks that are connected internally. (I'm not sure there are any made like this anymore). Obviously, with this kind of system you cannot fill the highest tank without overfilling the lower one. This is one reason why owners of these bikes tend to sit on them when they fill up—to keep the bike vertical so they can load as much gasoline as possible.
- **Do not smoke within 20 feet of a gas pump.**
- **Keep the ignition switch off.** Any time your filler cap is off your tank do not use any electrical equipment, CB, cell phone, etc. which could cause a small spark.
