

At-Home Color Maintenance

Red Toner Kit

Your Custom Red Toner Kit will maintain your vibrant red tone between appointments!

In Your Kit: Non-latex Nitrile gloves, plastic cap, applicator bottle, bottle/tube custom color, 2-4oz. color developer, a comb, and these directions for your Red Toner Kit.

1. Processing time will vary greatly on wet hair vs. dry hair. Color saturation is best on freshly washed and towel-dried hair. Red color processing times on towel-dried hair range from 30-45 minutes. Dry hair can process as fast as 20 minutes. The red color molecule takes a long time to process fully and develop its required depth.
2. It is best to apply your toner fresh out of the shower while wearing a towel or button-down shirt, this will be easier to get back in the shower for washing out the color or wash in the kitchen sink.
3. Be sure you have your gloves on to protect your hands! Red color can stain quickly.
4. Mix your color and developer in your applicator bottle and shake it up while placing your finger over the nozzle. Always color hair in the bathroom and watch for any drops on the floor during the application process.
5. Apply your color over smooth combed out hair, in quick even strokes, from your hairline down to the nape of the neck.
6. Massage the color quickly for blending and quickly apply to your ends.
7. Massage it through and use your comb for even saturation. Clean up any color spots on the skin using a paper towel or cotton pad with soap and water.
8. Once it is processed, rinse very thoroughly, wash with shampoo, and apply your conditioner.
9. If you get color in your eyes, flush immediately with water.
10. It is advisable to use your red toner at the halfway mark between scheduled appointments.

Custom Notes For Client:
