

Traction Table

-Intersegmental Traction / Decompression. IST (intersegmental traction / decompression) is a table you lay on which has a specially-designed roller that travels up and down your spine. It is used to help mobilize and decompress tension trapped in your spinal joints, discs, tendons and muscles. Its depth is adjustable and vibration is an option.

Affordable Care to Patients without Healthcare

-We understand that your health is important to you, we have made it affordable to take your health into your own hands. If you aren't covered for massage and chiropractic on your health insurance no problem we accept cash patients at a rate that is affordable to you.

Advanced Chiropractic Care

-Advanced Chiropractic Care. Chiropractic adjustments are the foundation of what we do here at Back to Health Chiropractic. Chiropractic is a safe and effective method for realigning vertebrae along the spinal column. Adjustments often lead to immediate relief of painful symptoms and when chiropractic is combined with our other services, you are on your way to having a healthier body with less suffering. Dr. Dang is trained in many advanced chiropractic correction techniques that are gentle, safe, and that feel good.

Family Friendly Environment

-We provide an environment suitable for you whole family! Can't make your appointment because you can't find a sitter? Don't worry we have coloring books to keep your kids entertained during the time of your service. Our friendly staff have kids of their own and know how tough it can be at times trying to schedule your life around your kids!
