

Statement of Educational Philosophy

At The Kiddie Kollege - Norco, we take pride in the fact that families have entrusted us with the care and education of the most precious members of their family. Our child care center is an extension of the home offering children the place and the opportunity to experiment, investigate and explore the wonderful world in which they live.

The Kiddie Kollege - Norco is a safe place where children can play and learn in a stimulating environment. It is so much more than solely childcare; we provide a quality learning environment for children ages 2 - 12, a place where children will be introduced to the beginning of their formal education, make their first friends and learn to play, a place where they will learn life skills and put them into action, and a fun and flourishing place for kids to be kids.

It is our goal to thoughtfully and intentionally teach children through carefully prepared classroom environments where the teaching is intentional and encourages children to explore, examine, question, investigate and experiment by trial and error.

At The Kiddie Kollege - Norco, we believe in teaching children on purpose, with purpose. Our center is a place where children can learn, play, have fun and be emotionally secure while their parents are away. Our teachers are professional, loving and gifted with the ability to relate to children in a special way. We are committed to excellence in the quality of care of the children and families we serve.
