About Us

A story of taste and tradition

Our history begins over a hundred years ago as a small vegetable and fruit packing installation. Our long, hard journey is a tale of love and commitment passed from generation to generation.

It's been over a century since the first KYKNOS can appeared in Greek households. Since then much has changed. However, in all these years the consumers' love and trust in KYKNOS have undoubtedly been an enduring one.

KYKNOS offers a tomato that is GMO Free, Gluten Free, and has no preservatives or artificial colors, from a can that may be healthier than a fresh tomato that has not been certified. All packaging of tomato products are BPA Free.

All KYKNOS tomatoes are certified for integrated crop management, and only the finest of crops goes into a KYKNOS can.

This is accomplished through a very well organized integrated crop management system in our farms.

They come in cans as well as paper packs.

WHY KYKNOS?

- ❖ Over 100 Years In Production.
- ❖ No GMO's.
- ❖ Glute Free.
- ❖ No Preservatives.
- ❖ No Artificial Colors.
- ❖ Packaging Is BPA Free.
