

Salty's adoption fee is \$275.

Salty is a handsome male Maltese/Bichon mix that is approximately 10 years of age and he weighs about 10 pounds. He is neutered, up to date on vaccines and micro chipped. Since coming into our care, he has had a dental assessment but unfortunately all his teeth needed to be removed as they were very badly infected. He also has a patch of bare skin on his lower back, but with an improved diet, some hair seems to be growing back in.

Salty is looking for a special home with owners who are patient and willing to take on a dog with a history of neglect and turn his life around. He was an unclaimed stray that understandably has serious trust issues and is still uncomfortable being touched.

Salty does respond well to routine, loves walks and behaves well on a leash. He is house trained if taken out several times a day, and isn't very vocal so would be suitable for condo/apartment living. We feel that Salty will need an adult only home with experienced, gentle but firm owners who will reinforce desired behaviors and continue the progress he has made so far. A gentle female older dog in the home would be a plus to serve as a companion and role model. If you feel that you can offer this senior gentleman a home where he can learn to trust and become a well-adjusted member of the family, we'd be glad to send you some additional information and an adoption application to complete.
