

BATSNER CO. SINCE 1919

# BATSNER COMPANY

a division of Henry M. Wood Company [WWW.BATSNER.COM](http://WWW.BATSNER.COM)

Bulk Materials Handling Equipment • Level and Inventory Control Equipment • Process Controls  
Flame and Toxic Gas Detection Equipment

## Batsner Material Handling

Rotary airlock feeders for handling dry bulk materials.

Self-lapping metal disc valves for dry bulk materials and slurries.

The Smart Elbow® for pneumatic and slurry conveying systems virtually eliminates elbow wear, product degradation, plugging, surging, cross-contamination, noise, turbulence, etc.

Affordable Storage and Dispensing Systems.  
Complete engineering for both manual and complete automation.

Manufacturers of Batch, Continuous, Hi-Intensity Mixers, Size Reduction, Shredder and Pulverizer Equipment and De-Lumpers.

Fully pneumatic vacuum conveying. Standard systems constructed with stainless steel with food grade 3-A systems and carbon steel options. Innovating COAX technology to advance Venturi's Principle for versatility and increased performance pump operation.

Product Separation for the pharmaceutical, chemical, plastic and food industry and all others where material screening is required. Designed for both dry and liquid applications.

Dense and dilute phase vacuum and pressure conveying systems. Complete line of all pneumatic components. Custom engineering to match the application.

Complete line of open mouth, valve and auger bagging systems; Avatar form, fill, and seal systems. Bulk bag unloaders and filling systems.  
Custom engineering to meet application.

## Batsner Safety and Instrumentation

Single point and continuous sensors for bulk materials.

Flame and Gas Detection, Safety Instrumented Systems.

A UTC Fire & Security Company

Light Curtains, safety mats, two-hand controls and safety PLC/HUB.

Punch press automation.

Ultrasonic Point and Continuous Level. Volume and Flow Measurement and Control.  
Solid and Liquid Level Switches.

Single point tip switch level sensors with dampened response for severe applications.

"Ears" for Grinding Mills and Differential Speed Detection.

## Batsner Environmental

Skimmers to recover all types of floating waste oils, fats and greases.
