Important eFiling Information:

- File size is limited to 50Mb (smaller files encouraged).
- [FERC acceptable file formats](#).
- eFilings must be submitted in a text searchable format.
- Privileged and Critical Energy Infrastructure Information (CEII) may be eFiled under the appropriate Security tab on the File Upload Screen.
- Material subject to a Protective Order and material for which Protected treatment is requested may now be efiled under the Privileged tab on the File Upload screen.

Confirmation Receipt: For both eFiling and eComment, you will receive a Confirmation of Receipt email within a few minutes of filing. Staff review is required for certain eFilings; this does not affect the submission date/time reflected in the Confirmation of Receipt email. Submissions via eComment are accepted without an Acceptance for Filing email.

If you do not already have a FERC online account, you will need to create one by clicking the eRegister button and filling in the online forms for a full registration. Once you complete the registration process, return to the eFiling page and login.

If you already have a FERC online account, login. Next page should look like this:

Document-less Intervention Description

Characters remaining:

In the text box, copy and enter something like this:

My name is _____ and I am a resident of Pendleton, New York. I live approximately _____ miles from the currently proposed site of the 22,214 horsepower gas compressor station in Pendleton and will be directly affected by, among other things, its construction and the air pollutants that the applicants have admitted the compressor station will emit, if constructed and operated.

I oppose this application for many reasons, including:

(1) representatives of the applicants admitted at their public forum on October 7, 2015 that the proposed compressor station will emit pollutants that are toxic to humans; the applicants' emissions estimates do not accurately reflect the emissions from the actual operation of similar compressor stations;

(2) there should be an environmental impact study conducted prior to any approval of this application; numerous entities, including the American Medical Association, have urged legislators and regulators not to approve new fracked natural gas infrastructure projects until the health impacts of such infrastructure projects have been studied and reported;

(3) by admitting that the natural gas product flowing through the Pendleton pipeline and proposed compressor station will be delivered to Canada, the applicants cannot establish the requisite public necessity for this project; and

(4) there are alternative sites for the compressor station than are not surrounded by residential neighborhoods; the applicants have not denied the viability of those alternative sites; they have instead contended only that the alternative sites would increase the project's overall cost.

For these reasons, I respectfully request that the Commission grant this motion to intervene.
