Applications

- Military
- Police
- EMS
- First Responders

Indications for Use: As a sterile hemostatic dressing for emergency external use and temporary wound treatment to achieve hemostasis in cases of moderate to severe bleeding.

How it works:
1. Gauze is packed into wound
2. Direct pressure is applied
3. Clot forms rapidly
4. Bleeding stops
5. Compression bandage is wrapped and locked in place

UltraClot® One-Step Compact Advantages

- Stops bleeding rapidly
- No wound enlargement required
- Conforms to any wound site
- Stable clot
- Effective on heparinized blood
- Easily removed by standard irrigation & suction
- No additional debridement required
- Non-exothermic
- Effective in any weather
- 3 year sterile shelf life

3 in x 4 yds Gauze with 4 in wide compression bandage
