TOOLS
FOR
Success

Reflection is a sadly abandoned and often underused skill. Most learning takes place when we take the time to examine the results we have produced. In this professional development segment we investigate effective time manageable ways to include reflection as a valuable tool in the classroom.

Topics to be discussed:

What are the alphas and deltas of any reflection?

How to gather evidence that allows you to appropriately “reflect”.

How can reflection be utilized as a learning tool?

How to examine the reflection data from the lesson/assessment and utilize that reflection as a learning tool.

Key Take a ways:

A reflection tool that will become a measurement of future goals.

A strategic plan of what has and what has not worked in the assessment/learning and how to utilize reflection to change it.

We customize our packages for each individual school district based upon their needs, their wants and their challenges.
