Family Report: Patient Behavior and Memory Problems

The information provided in this questionnaire helps the doctor decide if an important memory problem is present. It is best if this is filled out by someone with close, frequent contact with the patient. Many people have had minor and subtle problems with higher mental functions for years before they come to a doctor with questions about changes in memory. Please take a moment and go back in your mind a few months at a time and think about possible signs of memory problems. You may not be having any of these problems, and in that case please just record that information. We thank you for taking the time to complete this information.
