

Tesoro SierraLux Care & Maintenance

Simple steps to care for & clean your flooring:

SierraLux surfaces are easy to clean and offer additional stain resistance. Their finishes are made of polyurethane, with Anti-microbial & Ceramic Bead finishes for additional protection.

Whichever series you purchased, following these simple cleaning tips will help keep your flooring looking great:

Do

- Sweep your floors regularly to remove loose dirt and grit.
- Use felt pads under furniture & appliance legs
- Use protective mats under ALL rolling chairs!
- Use walk off mats in all entry ways
- Adjust for full sun – long term exposure can slowly fade it just like real wood
- Wipe up any spills.
- For fixing small scratches – use Minwax Blend Fil Colored Pencils
- Clean your floors using Bona™ Stone, Tile and Laminate Cleaner
Simply spray the cleaner on the floor and use a dry mop.
- For difficult spills, use Bona™ Stone, Tile and Laminate Cleaner and wipe clean with a dry white cloth.
- For deeper cleaning – use only pH neutral cleaners

Don't

- Don't use any harsh chemicals to clean.
- Don't use abrasive pads
- Don't use steam cleaners.
- Don't use a commercial vacuum with a heavy beater bar.
- Don't drag anything across the floor

If you follow all these steps you will have a beautiful SierraLux floor for years to come!
